

# The 1987 Index to

# Materials Performance

A guide to **Materials Performance**, Volume 26, 1987

## MP by month and title

### JANUARY

Editorial: Farewell Tenny Hull, Welcome Chip Lee,	L. C. Rowe	7
Industry overview—Materials engineering in the chemical process industry, R. B. Puyar		9
The effect of process and environmental changes on corrosion, T. F. Degnan		11
Evaluation of corrosion resistant resins for hot/wet chlorine service, R. D. Lake, R. B. Henrich, W. H. Julius, T. S. McQuarrie		16
Measurement of wear and corrosion rates using a novel slurry wear test, B. W. Madsen		21
Design of pressure vessels and tanks to minimize corrosion, R. D. Merrick		29
Hydrogen effects on steel, D. Warren		38
A silicon-alloyed stainless steel for highly oxidizing conditions, R. R. Kirchheimer, F. Hofmann, T. Hoffmann, G. Rudolph		49
Corrosion Basics		53

### FEBRUARY

Editorial: Need help—Call a consultant,	L. C. Rowe	7
A study of the sulfide stress cracking behavior of two low alloy steels, M. D. Tumuluru		9
Corrosion control in enhanced oil recovery wells, R. L. Martin, T. G. Braga		16
Advances in offshore cathodic protection modeling using the boundary element method, R. Strommen, W. Keim, J. Finnegan, P. Meh dizadeh		23
Stress corrosion cracking of precipitation-hardening stainless steels, R. R. Gaugh		29
Corrosion of metals by thermophilic microorganisms, T. E. Ford, M. Welch, R. Mitchell		35
Discussion: Stress corrosion cracking and hydrogen embrittlement of high strength nonmagnetic alloys in brines, R. R. Gaugh		39
Corrosion evaluation of alloys for nuclear waste processing, R. A. Corbett, W. S. Morrison, D. F. Bickford		40
Technical Note: Corrosion by fire retardant, J. G. Stoecker		45

The influence of carbon steel on the toxicity of a combined filming inhibitor biocide, A. P. Barton, C. Jensen		48
--	--	----

Duplex stainless steel pipelines and piping on the North Slope, A. C. Madsen, F. O. Mueller, R. Geisert, J. B. Lee, H. J. Choi		49
Corrosion Basics		71

### MARCH

Editorial: Are technical papers in MP meeting member needs? L. C. Rowe		7
An electrochemical technique for the prediction of long-term corrosion resistance of copper plumbing systems, M. Akkaya, J. R. Ambrose		9

Biofilm system for rapid evaluation of concrete resistance to sulfur-oxidizing bacteria, W. Sand, E. Bock, D. C. White		14
--	--	----

Intergranular attack of Alloy 600 in pressurized water reactor steam generator tubes, J. Darat, G. Santarini		18
--	--	----

Corrosion and cracking behavior of a martensitic 12Cr-3.5NiFe alloy in simulated sour gas environments, A. K. Agrawal, W. H. Steigelmeyer, J. H. Payer		24
--	--	----

Field measurement of the distribution coefficients of chemical additives used for corrosion control in steam-water cycles, R. Gilbert, S. E. Saheb		30
--	--	----

Modification of critical crevice temperature test procedures for nickel alloys in a ferric chloride environment, E. L. Hibner		37
---	--	----

Oxygen scavengers—The chemistry of sulfite under hydrothermal conditions, I. J. Cotton		41
--	--	----

NACE Task Group T-EG-22 Technical Committee Report—Surface preparation of contaminated steel surfaces		49
---	--	----

Surface preparation for coating life		63
--------------------------------------	--	----

Corrosion Basics		79
------------------	--	----

### APRIL

Editorial: Bending the truth, L. C. Rowe		7
--	--	---

Focus on copper in modern corrosion research, E. Mattson		9
--	--	---

The mechanics of polymers in alkaline cooling water programs, J. E. Hoots, G. A. Crucil		17
---	--	----

Detection of susceptibility to selective corrosion attack in cast CF-3M stainless steel, D. R. Stickle, T. C. Spence		26
--	--	----

Anode protection to prevent the stress corrosion cracking of pressure vessel steels in alkaline sulfide solutions, D. Singbeil, A. Garner		31
---	--	----

Corrosion fatigue of cast suction-roll alloys in simulated paper-making environments, C. E. Jeske, A. P. Castillo		37
---	--	----

Cyclic reheat materials evaluation—Part 3, H. H. Krause, P. A. Ireland, G. A. Charles, R. G. Rhudy, B. C. Syrett		44
--	--	----

Corrosion data program workshop summary, compiled by E. D. Verink, J. Kolts, J. Rumble, G.M. Uglansky		55
---	--	----

Corrosion Basics		72
------------------	--	----

### MAY

Editorial: Setting your priorities, L. C. Rowe		7
--	--	---

Industry overview—Domestic water systems demand effective technology of materials, T. M. Laronge		9
--	--	---

Recovery from low pH excursions in cooling water systems using all-organic treatment, R. K. Fuller, J. W. McCarthy		11
--	--	----

Stress-enhanced corrosion of boiler tubing, M. J. Eschner		17
---	--	----

Removal of deposits from potable water systems using carbon dioxide, C. H. Neff, R. W. Lane		21
---	--	----

Underdeposit corrosion in boiler applications, F. H. Seels		29
--	--	----

Discussion—Diffusion of dissolved oxygen through concrete		34
---	--	----

Field observations of microbiologically induced corrosion in cooling water systems, D. Thierry		35
--	--	----

Underground corrosion of water pipes in Calgary, Canada, J. A. Jakobs, F. W. Hawes		42
--	--	----

The effect of manufacturing processes on the atmospheric corrosion of aluminum conductor wires, P. G. R. Zaye, D. P. Doyle		50
--	--	----

Erratum		55
---------	--	----

Corrosion Basics		81
------------------	--	----

**JUNE**

Editorial: More about MP, L. C. Rowe	7
Corrosion resistance of high-chromium steels in coal gasification atmospheres, S. Kihara, K. Nakagawa, A. Ohnomo, M. Kato	9
The use of nitrogen to improve the corrosion resistance of FeCrNiMo alloys for the chemical process industries, J. R. Kearns, H. E. Devereil	18
Erratum	28
Cathodic protection of aluminum-coated steel in seawater, P. O. Gartland	29
Differential scanning calorimetric studies of the corrosion-resistant behavior in the 7000 series aluminum alloys, E. S. Tankins, W. E. Frazier	37
Discussion—The effect of process and environmental changes on corrosion	44
A heat treatment for reducing corrosion and stress corrosion cracking susceptibilities in 7XXX aluminum alloys, J. J. Thompson, E. S. Tankins, V. S. Agarwal	45
Use of an acoustic borehole televiwer to investigate casing corrosion in geothermal wells, C. C. Carson, T. Baumer	53
Corrosion Basics	67

**JULY**

Editorial: Fact or Fiction, L. C. Rowe	7
Industry overview—Atmospheric corrosion after 80 years of study, S. W. Dean	9
Effects of acidic deposition on the atmospheric deterioration of materials, F. W. Lipfert	12
Stress corrosion cracking failure of brass electrical connectors in an outdoor atmospheric environment, M. K. Han, J. A. Beavers, W. Goins	20
The effects of sheltering and orientation on the atmospheric corrosion of structural metals, J. P. Carter, P. J. Linstrom, D. R. Flinn, S. D. Cramer	25
Acid rain and weathering damage to carbonate building stone, M. M. Reddy, C. A. Youngdahl	33
Twenty-year atmospheric corrosion tests of hot-dip coated sheet steel, H. E. Townsend, A. R. Borzillo	37
Atmospheric corrosion ratings of weathering steels—calculation and significance, M. E. Komp	42
Characteristics and performance of the LIDA impressed current system in natural waters and saline muds, C. F. Schriber, G. L. Mussolini	45
Technical note—Betacrunch Version 2.0, N. D. Greene, R. H. Gandhi	52
Discussion—A study of the sulfide stress cracking behavior of two low alloy steels	54
Corrosion Basics	61
Pipeline cathodic protection—NACE reviews the criteria, D. Miller	73
Cathodic protection of automobiles—Does it work? R. Babolen	82

**AUGUST**

Editorial: Reflections of Friends, L. C. Rowe	7
Application of CrNi stainless steel weld metals to polythionic acid environments, K. Tamaki, S. Nakano, M. Kimura	9
Magnesium anode performance, B. A. Martin	14
Failure analysis of an amine-absorber pressure vessel, H. I. McHenry, D. T. Read, T. R. Shives	18

Influence of thermal history on the corrosion resistance of duplex stainless steel pipeline, K. Ume, N. Seki, Y. Naganawa, T. Hyodo, K. Satoh, Y. Kuriki

Technical note—Corrosion of packaged cadmium plated electrical control units from paint vapor, L. A. Brough

Corrosion control in the geothermal drilling industry, C. E. Bridges, G. W. M. Hobbs

Cationic film-forming inhibitors for the corrosion protection of AA 7075 aluminum alloy in chloride solutions, D. R. Arnett, B. R. W. Hinton, N. E. Ryan

Catalysts and inhibition in oxygen scavenging, A. K. Dunlop

Refinery construction in arctic weather conditions—some construction, inspection, and corrosion concerns, S. Bearmont

Corrosion Basics

EPA stance on USTs—A review of proposed regulations, S. H. Nacht

Life-cycle cost comparison of alternative materials for flue gas desulfurization components, Y. M. Shah, J. D. Redmond

NACE Standard Recommended Practice RP0472-87—Methods and controls to prevent in-service cracking of carbon steel welds in P-1 materials in corrosive petroleum refining environments

Corrosion Basics

**NOVEMBER**

Editorial: Take all you can get, L. C. Rowe

Industry overview: Coatings—The challenge of the 1990s, K. B. Tator

Corrosion resistance and erection of nickel alloy liners in flue gas desulfurization systems, J. L. McDonald, V. D. Coppolechia, G. K. Grossmann

Weld integrity in cladded structures, T. S. Sudarshan, J. H. Wilson

The use of coatings to supplement cathodic protection of offshore structures, W. H. Thomason, S. E. Pape, S. Evans

Pipeline coating performance—Field experience of an operating petroleum company, M. Roche, J. P. Samaran

Rust conversion coatings, P. J. Deslauriers

Acid car corrosion mechanism, monitoring, and protection, S. L. Pohman, T. N. Andersen

Effect of an acid rain environment on limestone surfaces, V. G. Moscott, J. R. Lindsay, M. F. Hochella, Jr.

Corrosion of recovery boiler waterwall composite tubes, D. A. Wensley

NACE Standard Recommended Practice RP0257—Field measurement of surface profile of abrasive blast cleaned surfaces using a replica tape

Corrosion Basics

**DECEMBER**

Editorial: Kick up the dust, L. C. Rowe

Industry overview—Rebar corrosion, J. Timmer

A review of cathodic protection of reinforced concrete, B. S. Wyatt, D. J. Irvine

Cathodic protection of reinforced concrete using metallized zinc, J. A. Apostolos, D. M. Parks, R. A. Caruso

The uses of precast polymer concrete shapes, R. A. Cubeta

Cathodic polarization and fracture property evaluation of a pretensioned steel tendon in concrete, W. T. Scannell, W. H. Hart

The control of erosion-corrosion in slurry pipelines, J. Postlethwaite

Computer-assisted tomography for the nondestructive evaluation of hydrogen-induced cracking in steel, R. L. Tapping, B. D. Sawicki

Technical note—Calculation of alloy equivalent weight, S. W. Dean

NACE Standard Recommended Practice RP0187-87—Design Considerations for Corrosion Control of Reinforcing Steel in Concrete

Corrosion of metals in concrete: It costs money, R. P. Brown

Cathodic protection of reinforced concrete structures, J. A. Lehmann

Corrosion Basics

## MP index by subject

(Issue no. is followed by page no.)

### ABRASION

cavitation fundamentals, 6- 67  
fracturing phenomena fundamentals, 3- 79  
geothermal well drill protection, 8- 34  
life-cycle costs of flue gas desulf materials, 10- 50  
slurry pipeline erosion-corrosion control, 12- 41

### ABRASION-RESISTANT COATINGS

field experience data on pipeline coatings, 11- 28  
mixed metal oxide anode characteristics, 7- 45

### ABRASIVE SURFACE PREPARATION

NiCrMoWCo lining for flue gas stacks, 12- 11  
zinc-sprayed coating on concrete for CP, 12- 22

### Abrasives Other Than Sand Or Steel, Surf Prep:

11- 9  
Absorbers: life-cycle costs of flue gas desulf mater, 10- 50  
Absorption: T-6G-22—surf prep contam steel, 3- 49

### ACCELERATED LAB TESTING

coatings, cath prot on offshore structures, 11- 22  
concrete resist to sulfate-reducing bacteria, 3- 14  
crevice attack tests for welded SS in seawater, 9- 29  
NiCrMoWCo lining for flue gas stacks, 12- 11  
SCC of brass electrical connectors, 7- 20  
sulfide stress cracking—low-alloy steels, 2- 9  
tannin-based conversion coatings data, 11- 35

### Acetic Acids: low-Ni nonmagnet well drill collar, 9- 50 Acid Surface Prep: portable water cleaning with $\text{CO}_2$ , 5- 21

### ACIDS

acid rain attack on limestone, 11- 47  
geothermal well drill protection, 8- 34  
N alloying of FeCrNiMo process alloys, 6- 18  
properties of precast polymer concrete, 12- 29

### Acids, Mixed: mixed acids vs nickel-based alloys, 10- 17

### Acoustic, Testing: acoustical tests of casing in wells, 6- 53

### Acrylate Inhibitors: polymeric alkaline coros inhib, 4- 17

### Acrylics: tannin-based conversion coatings data, 11- 35

### ADHESION

coatings, cath prot on offshore structures, 11- 22  
tannin-based conversion coatings data, 11- 35

### ADHESIVE EFFECTS

coatings, cath prot on offshore structures, 11- 22  
field experience data on pipeline coatings, 11- 28

### AERATION

copper alloys vs seawater—use guidelines, 9- 12  
geothermal well drill protection, 8- 34  
slurry pipeline erosion-corrosion control, 12- 41

### Africa: field exper data on pipeline coatings, 11- 28

### Aging: 20-y tests hot dip Al, Zn, AlZn steel, 7- 37

### Aggregate-Loaded Polymer Castings: properties of pre-

cast polymer concrete, 12- 29

### Agitators: process, environmental infl on corrosion, 1- 11

### Air Blast Abrasive, Surf Prep: T-6G-22—surf prep con-

taminated steel, 3- 49

### Air Conditioners: chlorine decomposit of HEDP, 10- 24

### Aircraft: inhibitors for Al 7075 in chloride solut, 8- 42

### Alkaline Surf Prep: T-6G-22—surf prep cont steel, 3- 49

### AlZn coatings: 20-y tests hot dip Al, Zn, AlZn steel, 7- 37

### ALKALINE WATER

anodic prot vs alkaline kraft pulping, 4- 31  
geothermal well drill protection, 8- 34

### polymeric alkaline corrosion inhibitors, 4- 17

portable water system cleaning with  $\text{CO}_2$ , 5- 21

### ALKALIS AND SALTS

alloys to contain radioactive waste, 2- 40  
application of coatings to concrete, 12- 82

corrosion reactions under boiler deposits, 5- 29

N alloying of FeCrNiMo process alloys, 6- 18

### Alkalies, Coatings vs: cath prot on offshore struct, 11- 22

### Alkalization: review cath prot of steel rein concrete, 12- 12

### Alkyls Coatings: coating vapor attack on Cd-plated

metals, 8- 32

### ALLOYING

AISI 308, 309 welds vs polythionic acids, 1- 9

alloy equivalent weight calcul methods, 12- 51  
alloys to contain radioactive waste, 2- 40  
copper alloys vs seawater—use guidelines, 9- 12  
Erratum—N use to protect FeCrNiMo alloys, 10- 29  
hydrogen effects on steel, 1- 36  
low-Ni nonmagnetic well drill collar alloy, 9- 50  
mixed acids vs nickel-based alloys, 10- 17  
N alloying of FeCrNiMo process alloys, 6- 18  
nickel steels in arctic petroleum service, 10- 46  
paper mill suction roll fatigue tests, 4- 37  
 $\text{H}_2\text{SO}_4$  attack mechanism in railroad cars, 11- 41  
silicon-alloyed stainless steel vs  $\text{O}_2$ , 1- 49

### Alternating Stray Currents: mixed metal oxide anode characteristics, 7- 45

### ALUMINUM

acid deposition atmos effects on material, 7- 12  
corrosion fatigue—basics, 1- 63  
flame-sprayed Al on steel in seawater, 9- 35  
fuel gas cyclic reheat exchangers—Part 3, 4- 44  
fretting phenomena fundamentals, 3- 79  
metals vs microbes in 70 C water, 2- 35

### ALUMINUM ANODES

cathodic prot results on auto bodies, 7- 82  
coatings, cath prot on offshore structures, 11- 22

### ALUMINUM COATINGS

CP of Al-coated steel in seawater, 6- 29  
high-Cr steels vs 600 to 650 C coal combustion, 6- 9

### ALUMINUM Pipes: copper plumb corros rate predict, 3- 9

### Aluminum Salts: portable water cleaning with $\text{CO}_2$ , 5- 21

### Aluminum-Zinc Coatings: metals atmos attack vs shelter, orientation, 7- 25

### ALUMINUM, WROUGHT

calorimetric tests of PM Al 7000 alloys, 6- 37  
flame-sprayed Al on steel in seawater, 9- 35  
heat treat vs SCC of 7000 aluminum alloys, 6- 45  
inhibitors for Al 7075 in chloride solution, 8- 42  
metals atmos attack vs shelter, orientation, 7- 25

### Amines: H stress cracking failure—amine absorb, 8- 18

### AMMONIA

acid rain attack on limestone, 11- 47  
copper alloys vs seawater—use guidelines, 9- 12  
copper in modern corrosion research, 4- 9  
nitrogen inhib distribution in steam, water, 3- 30

### Ammonium Hydroxide: geothermal well drill prot, 8- 34

### AMMONIUM SALTS

ammonium sulfate vs wood copper piping, 2- 45  
metals atmos attack vs shelter, orientation, 7- 25

### ANAEROBIC MICROORGANISMS

biological attack in cooling water systems, 5- 34  
microbial attack monitoring at Prudhoe, 9- 42

### Annealing: thermal effects on CrNiMo duplex pipe, 8- 25

### Anodes, Distributed: review CP of steel rein conc, 12- 12

### Anodes, Galvanic: RP0367-87—cast CP anodes for off-

shore, 9- 55

### Anodes, Inert: mixed metal oxide anode character, 7- 45

### ANODIC ELECTRODE PHENOMENA

crevice attack tests for welded SS in seawater, 9- 29  
 $\text{H}_2$  absorption pretensioned steel tendons, 12- 32

mixed acids vs nickel-based alloys, 10- 17

tannin-based conversion coatings data, 11- 35

### ANODIC PROTECTION

anodic prot vs alkaline kraft pulping, 4- 31

$\text{H}_2\text{SO}_4$  attack mechanism in railroad cars, 11- 41

### Aqueous: copper in modern corrosion research, 4- 9

### Arc Spraying: zinc-sprayed coating on conc for CP, 12- 22

### ARCTIC, ANTARCTIC

arctic environments vs petroleum refineries, 8- 53

microbial attack monitoring at Prudhoe, 9- 42

nickel steels in arctic petroleum service, 10- 46

### ARSENIC

protective coatings—progress projection, 11- 9

$\text{H}_2\text{SO}_4$  attack mechanism in railroad cars, 11- 41

### Arsenites: copper in modern corrosion research, 4- 9

### ASBESTOS CEMENT PIPES

cast iron pipe underground corrosion, 5- 42  
portable water systems—status review, 5- 9

### ASHES

corrosion reactions under boiler deposits, 5- 29  
RP0187-87—design CP of steel rein concrete, 12- 53  
slurry pipeline erosion-corrosion control, 12- 41

### Asia: geothermal well drill protection, 8- 34

Asphalt Paving: zinc-sprayed coating on concrete for CP, 12- 22

### ASPHALT THICK FILM COATINGS

coating vapor attack on Cd-plated metals, 8- 32  
field experience data on pipeline coatings, 11- 28

### TANNIN-BASED CONVERSION COATINGS

acid deposition atmos effects on material, 7- 12  
Al wire properties infl vs atmospheric attack, 5- 50

### atmospheric corrosion factors, 8- 79

atmospheric corrosion—80 years of study, 7- 9

atmospheric corrosion basic information, 7- 61

cast iron pipe underground corrosion, 5- 42

chemical process industries current status, 1- 4

environmental attack on reinforced concrete, 12- 79

geothermal well drill protection, 8- 34

metals atmos attack vs shelter, orientation, 7- 25

pressure vessel designs vs corrosion, 1- 29

RP0187-87—design CP of steel-rein concrete, 12- 53

$\text{H}_2\text{SO}_4$  attack mechanism in railroad cars, 11- 41

SCC of brass electrical connectors, 7- 20

T-6G-22—surf prep contaminated steel, 3- 49

tannin-based conversion coatings data, 11- 35

weathering steels rate - . . .ations, 7- 42

zinc-sprayed coating on concrete for CP, 12- 22

20-y tests on hot dip Al, Zn, AlZn steel, 7- 37

Atmospheric On-Site Testing: T-6G-22—surf prep contaminated steel, 3- 49

### AUTOCLOVE TESTING

anodic prot vs alkaline kraft pulping, 4- 31

duplex SS pipelines vs cold seawater, 2- 49

### AUTOMOBILE TRANSPORTATION

atmospheric corrosion—80 years of study, 7- 9

corrosion prot res-'s on auto bodies, 7- 62

### Azoic Inhib: organics vs cooling water low pH excurs, 5- 11

### Backfill, Galvanic Anodes: calc Mg anode effic, 14- 14

### BACKFILL, INERT ANODES

mixed metal oxide anode characteristics, 7- 45

protective coatings—progress protection, 11- 9

### BATCH INJECTION, WELL INHIBITORS

enhanced oil recovery well corrosion, 2- 16

fretting phenomena fundamentals, 3- 79

Bending: boiler tube fabrication stress cells, 5- 17

### BIBLIOGRAPHIES

acid rain attack on limestone, 11- 47

hydrogen effects on steel, 1- 38

review cath prot of steel-rein concrete, 12- 12

steel-reinforced concrete status review, 12- 9

### BIOCIDES

chlorine decomposition of HEDP, 10- 24

copper alloys vs seawater—use guidelines, 9- 12

copper in modern corrosion research, 4- 9

microbial attack monitoring at Prudhoe, 9- 42

toxicity reduction by glass, metal containers, 2- 48

### BIOLOGICAL EFFECTS

concrete resist to sulfate-reducing bacteria, 3- 14

copper alloys vs seawater—use guidelines, 9- 12

metal sheathing for splash zone protection, 9- 23

metals vs microbes in 70 C water, 2- 35

microbial attack monitoring at Prudhoe, 9- 42

paper mill suction roll perform predictions, 10- 30

### Biological, Accelerated Lab Testing: microbial attack monitoring at Prudhoe, 9- 42

### BLISTERING OF MATERIALS, NOT COATINGS

corrosion reactions under boiler deposits, 5- 29

H stress cracking failure—amine absorbers, 8- 18

hydrogen effects on steel, 1- 38

**BLISTERING, COATINGS**

coatings, cath prot on offshore structures, 11- 22  
tannin-based conversion coatings data, 11- 35

**BOILER FEEDWATER CONTROLS**

corrosion reactions under boiler deposits, 5- 29  
nitrogen inhib distribution in steam, water, 3- 30  
sulfite controls for boiler feedwater, 3- 41

**BOILERS**

boiler tube fabrication stress tests, 5- 17  
corrosion reactions under boiler deposits, 5- 29  
intergran attack Alloy 600 in nuclear reactors, 3- 18  
SS cladding wastage in recovery boilers, 11- 53  
sulfite controls for boiler feedwater, 3- 41

**Bolts:** hydrogen effects on steel, 1- 36

**BONDING, ELECTRICAL**

review cath prot of steel-reinf concrete, 12- 12  
RP0187-87—design CP of steel-reinf concrete, 12- 53  
zinc-sprayed coating on concrete for CP, 12- 22

**BONDING, MECHANICAL**

review cath prot of steel-reinf concrete, 12- 12  
zinc-sprayed coating on concrete for CP, 12- 22

**Bonds, Atomic:** O<sub>2</sub> scavenging catalysts and inhib, 8- 48

**Boundary Element:** anal offshore cath prot, 2- 23

**Bracelet, Galvanic Anodes:** coatings, CP on offshore struct, 11- 22

**Brass:** SCC of brass electrical connectors, 7- 20

**BRICK**

pressure vessel design vs corrosion, 1- 29  
properties of precast polymer concrete, 12- 29

**BRIDGES**

review cath prot of steel-reinf concrete, 12- 12  
zinc-sprayed coating on concrete for CP, 12- 22

**Bromides:** environmental attack on reinf concrete, 12- 79

**Bromine:** polymers resistant to hot-wet chlorine, 1- 16

**Brush Application, Nonmetallic Coatings:** tannin-based conversion coatings data, 11- 35

**BUILDINGS**

acid rain attack on limestone, 11- 47  
acid rain effects on carbonate stones, 7- 33  
arctic environments vs petroleum refineries, 8- 53  
potable water system cleaning with CO<sub>2</sub>, 5- 21  
review cath prot of steel-reinf concrete, 12- 12

**Cable, Nonelectric:** coatings, CP on offshore struct, 11- 22

**Cables, Electrical Power Transmission:** mixed metal oxide anode characteristics, 7- 45

**Cadmium Coatings:** coating vapor attack on Cd-plated metals, 8- 32

**CALCAREOUS DEPOSITS**

coatings, cath prot on offshore structures, 11- 22  
flame-sprayed Al on steel in seawater, 9- 35

**CALCIUM**

chlorine decomposition of HEDP, 10- 24  
polymeric alkaline corrosion inhibitors, 4- 17

**CALCIUM CARBONATE**

acid deposition atmos effects on materials, 7- 12  
acid rain attack on limestone, 11- 47  
boundary element anal offshore cath prot, 2- 23  
copper plumbing corrosion rate predictions, 3- 9  
polymeric alkaline corrosion inhibitors, 4- 17

**CALCIUM CHLORIDE**

calculating magnesium anode efficiency, 14- 14  
review cath prot of steel-reinf concrete, 12- 12  
RP0187-87—design CP of steel-reinf concrete, 12- 53

**Canada:** cast iron pipe underground corrosion, 5- 42

**Capacitors:** copper alloys vs seawater—use guides, 9- 12

**CARBIDES**

AISI 308, 309 welds vs polythionic acids, 1- 9  
Disc—sulfide stress cracking on two steels, 7- 54  
silicon-alloyed stainless steel vs O<sub>2</sub>, 1- 49  
test of CF-3M steels to selective attack, 4- 26

**CARBON**

copper in modern corrosion research, 4- 9  
properties of precast polymer concrete, 12- 29

**Carbon Anodes, CP:** review CP of steel reinf conc, 12- 12

**CARBON DIOXIDE**

duplex SS pipelines vs cold seawater, 2- 49  
enhanced oil recovery well corrosion, 2- 16  
environmental attack on reinforced concrete, 12- 79  
field experience data on pipeline coatings, 11- 28  
high-Cr steels vs 600 to 650 C coal combustion, 6- 9  
potable water system cleaning with CO<sub>2</sub>, 5- 21  
seawater corrosion—summary and review, 9- 9  
slow strain rate, NACE TM0177 compared, 10- 42  
thermal effects on CrNiMo duplex pipe, 8- 25

**Carbon Monoxide:** high-Cr steels vs 600 to 650 C coal combustion, 6- 9

**CARBON STEEL**

acid deposition atmos effects on materials, 7- 12  
anodic prot vs alkaline kraft pulping, 4- 31  
atmospheric corrosion—80 years of study, 7- 9  
cathodic prot results on auto bodies, 7- 82  
computer-assisted tomography of steel, 12- 46  
copper alloys vs seawater—use guidelines, 9- 12  
copper cladding on steel welding methods, 11- 17  
corrosion reactions under boiler deposits, 5- 29  
CP of Al-coated steel in seawater, 6- 29  
Disc—sulfide stress cracking of two steels, 7- 54

economic impact of concrete corrosion, 12- 78

environmental attack on reinforced concrete, 12- 79

flame-sprayed Al on steel in seawater, 9- 35

H<sub>2</sub> absorption pretensioned steel tendons, 12- 32

metal sheathing for splash zone protection, 9- 23

NACE cathodic protection educ programs, 10- 75

pipe-to-soil IR drop compensating measures, 10- 38

pipeline CP—NACE reviews criteria, 7- 73

review cath prot of steel-reinf concrete, 12- 12

RP0187-87—design CP of steel-reinf concrete, 12- 53

seawater corrosion—summary and review, 9- 9

steel-reinforced concrete status review, 12- 9

underground storage tanks—EPA stance, 8- 80

zinc-sprayed coating on concrete for CP, 12- 22

20-y tests hot dip Al, Zn, AlZn steel, 7- 37

**CATIONIC EFFECTS**

chlorine decomposition of HEDP, 10- 24

inhibitors for Al 7075 in chloride solutions, 8- 42

O<sub>2</sub> scavenging catalysts and inhibition, 8- 48

**CAVITATION**

cavitation fundamentals, 6- 67

copper alloys vs seawater—use guidelines, 9- 12

**Cementing:** Disc—proc envir changes influence, 6- 44

**Centrifuge Blast Abrasive, Surface Prep:** T-6G-22—surf

prep contaminated steel, 3- 49

**Ceramic Coatings:** flue gas cyclic reheat exchangers—Part 3, 4- 44

**CERAMICS**

impact of corrosion science and engineering, 10- 9

test for erosion-corrosion in slurries, 1- 21

**Carbur:** inhibitors for Al 7075 in chloride solut, 8- 42

**CERMETS**

Al wire properties infl vs atmospheric attack, 5- 50

cast iron pipe underground corrosion, 5- 42

**Charpy Test:** Ni steels in arctic petrol service, 10- 46

**Cheiation:** polymeric alkaline corrosion inhibitors, 4- 17

**CHEMICAL INDUSTRIES**

chemical process industries current status, 1- 4

polymers resistant to hot-wet chlorine, 1- 16

pressure vessel design vs corrosion, 1- 29

process, environmental infl on corrosion, 1- 11

**CHEMICAL OR ELECTROCHEMICAL TESTING**

copper plumbing corrosion rate predictions, 3- 9

CP of Al-coated steel in seawater, 6- 29

Disc—sulfide stress cracking on two steels, 7- 54

duplex SS pipelines vs cold seawater, 2- 49

heat treat vs SCC of 7000 aluminum alloys, 6- 45

high-Cr steels vs 600 to 650 C coal combustion, 6- 9

inhibitors for Al 7075 in chloride solutions, 8- 42

metals vs microbes in 70 C water, 2- 35

N alloying of FeCrNiMo process alloys, 6- 18

RP0387-87—cast CP anodes for offshore, 9- 55

test for erosion-corrosion in slurries, 1- 21

**Chemical Surf Prep:** copper alloys vs seawater—use guidelines, 9- 12

**CHLORIDES**

acid deposition atmos effects on materials, 7- 12

copper alloys vs seawater—use guidelines, 9- 12

economic impact of concrete corrosion, 12- 78

environmental attack on reinforced concrete, 12- 79

flue gas cyclic reheat exchangers—Part 3, 4- 44

H<sub>2</sub> absorption pretensioned steel tendons, 12- 32

low-Ni nonmagnetic well drill collar alloy, 9- 50

mixed metal oxide anode characteristics, 7- 45

paper mill suction roll fatigue tests, 4- 37

review cath prot of steel-reinf concrete, 12- 12

RP0187-87—design CP of steel-reinf concrete, 12- 53

SCC of precipitation-hardening stainless, 2- 29

steel-reinforced concrete status review, 12- 9

T-6G-22—surf prep contaminated steel, 3- 49  
thermal effects on CrNiMo duplex pipe, 8- 25  
20-y tests hot dip Al, Zn, AlZn steel, 7- 37

**CHLORINE**

chlorine decomposition of HEDP, 10- 24  
copper alloys vs seawater—use guidelines, 9- 12  
high-Cr steels vs 600 to 650 C coal combustion, 6- 9  
mixed metal oxide anode characteristics, 7- 45  
polymers resistant to hot-wet chlorine, 1- 16  
process, environmental infl on corrosion, 1- 11

**Chlorites:** sulfite controls for boiler feedwater, 3- 41  
**Chromate Inhib:** slurry pipeline eros-corros control, 12- 41  
**Chromates:** prot coatings—progress projection, 11- 9  
**Chromium:** alloys to contain radioactive waste, 2- 40  
**Chromium-Molybdenum Alloys:** life-cycle costs of flue gas desulf materials, 10- 50

**CLEANING**

copper alloys vs seawater—use guidelines, 9- 12  
corrosion reactions under boiler deposits, 5- 29  
flue gas cyclic reheat exchangers—Part 3, 4- 44  
NiCrMoWCo lining for flue gas stacks, 12- 11  
paper mill suction roll fatigue tests, 4- 37  
potable water system cleaning with CO<sub>2</sub>, 5- 21

**Coal Tar Epoxy Coatings:** CP on offshore struct, 11- 22

**COAL TAR THICK FILM COATINGS**

Al wire properties infl vs atmospheric attack, 5- 42  
cast iron pipe underground corrosion, 5- 42  
field experience data on pipeline coatings, 11- 28

**COAL**

acoustical tests of casing in wells, 6- 53  
flue gas cyclic reheat exchangers—Part 3, 4- 44  
process, environmental infl on corrosion, 1- 11  
sulfite controls for boiler feedwater, 3- 41

**Coal Gases:** hi-Cr steels vs 600-650 C coal combust, 6- 9  
**Coal, Pulverized:** slurry pipeline eros-corros control, 12-41

**COATINGS**

application of coatings to concrete, 12- 82  
atmospheric corrosion—80 years of study, 7- 9  
coating vapor attack on Cd-plated metals, 8- 32  
environmental attack on reinforced concrete, 12- 79  
field experience data on pipeline coatings, 11- 28  
geothermal well drill protection, 8- 34  
pipe-to-soil IR drop compensating measures, 10- 38  
RP0167-87—design CP of steel-reinf concrete, 12- 53  
steel-reinforced concrete status review, 12- 9

**Coatings Failure Modes:** CP on offshore struct, 11- 22

**Coatings, Nonmetallic:** cast iron pipe underground corrosion, 5- 42

**Coatings Testing:** field data on pipeline coat, 11- 28

**COBALT**

inhibitors for Al 7075 in chloride solutions, 8- 42  
sulfite controls for boiler feedwater, 3- 41

**Coke, Petroleum:** arctic environ vs petro refineries, 8- 53

**COLD WORK**

boiler tube fabrication stress cells, 5- 17  
cavitation fundamentals, 6- 67  
hydrogen effects on steel, 1- 38  
SCC of brass electrical connectors, 7- 20

**Colorimetric Testing:** colorimetric tests of PM Al 7000 alloys, 6- 37

**COMBUSTION GASES**

acid deposition atmos effects on materials, 7- 12  
flue gas cyclic reheat exchangers—Part 3, 4- 44  
high-Cr steels vs 600 to 650 C coal combustion, 6- 9  
impact of corrosion science and engineering, 10- 9  
life-cycle costs of flue gas desulf materials, 10- 50  
NiCrMoWCo lining for flue gas stacks, 12- 11  
properties of precast polymer concrete, 12- 29

**Combustion:** enhanced oil recovery well corrosion, 2- 16

**COMMITTEES, TECHNICAL, NACE**

chemical process industries current status, 1- 4  
pipeline CP—NACE reviews criteria, 7- 73

**Compacted Multiphase Or Mixtures:** colorimetric tests of PM Al 7000 alloys, 6- 37

**COMPRESSIVE STRESS EFFECTS**

application of coatings to concrete, 12- 82  
cavitation fundamentals, 6- 67

**Computer-Assisted Tomography:** CAT of steel, 12- 46

**COMPUTER CALCULATIONS**

boundary element anal offshore cath prot, 2- 23  
chemical process industries current status, 1- 4  
computer calc rates, electrochem data, 7- 52  
corrosion control data acquisition, use, 4- 55

**DICTIONARIES**

RP0187-87—design CP of steel-reinf concrete, 12- 53  
 RP0387-87—cast CP anodes for offshore, 9- 55

**DIFFUSION, MATERIALS EFFECTS**

Disc—O<sub>2</sub> diffusion through concrete, 5- 34  
 hydrogen effects on steel, 1- 38  
 H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11- 41

**Digesters:** anodic prot vs alkaline kraft pulping, 4- 31

**DISBONDING, COATINGS**

cathodic prot results on auto bodies, 7- 82  
 field experience data on pipeline coatings, 11- 28

**DISCUSSIONS**

Disc—proc envir changes influence, 6- 44  
 Disc—sulfide stress cracking on two steels, 7- 54  
 Disc—O<sub>2</sub> diffusion through concrete, 5- 34  
 Disc—SCC-H<sub>2</sub> embrit nonmagnetic alloys, 2- 39

**Dislocations:** heat treat vs SCC of 7000 Al, 6- 45

**Dispensing:** polymeric alkaline corrosion inhibitors, 4- 17

**Domestic Plumbing:** portable water system cleaning with CO<sub>2</sub>, 5- 21

**DRILLING FLUIDS, WELLS**

Disc—sulfide stress cracking on two steels, 7- 54  
 geothermal well drill protection, 8- 34  
 low-Ni nonmagnetic well drill collar alloy, 9- 50

**Drills, Tools:** Disc—SSC on two steels, 7- 54

**DRINKING WATER**

Al wire properties infl vs atmospheric attack, 5- 50

cast iron pipe underground corrosion, 5- 42  
 mixed metal oxide anode characteristics, 7- 45

**DUCTILITY**

AISI 308, 309 welds vs polythionic acids, 1- 9  
 H stress cracking failure—amine absorbers, 8- 18

**Ducts:** copper alloys vs seawater—use guides, 9- 12

**DUPLEX STAINLESS STEELS**

duplex SS pipelines vs cold seawater, 2- 49  
 nickel steels in arctic petroleum service, 10- 46  
 paper mill suction roll fatigue tests, 4- 37  
 paper mill suction roll perform predictions, 10- 30  
 thermal effects on CrNiMo duplex pipe, 8- 25

**ECONOMICS**

acid deposition atmos effects on materials, 7- 12  
 chemical process industries current status, 1- 4

chlorine decomposition of HEDP, 10- 24  
 coatings, cath prot on offshore structures, 11- 22

economic impact of concrete corrosion, 12- 78  
 field experience data on pipeline coating, 11- 28

geothermal well drill protection, 8- 34

impact of corrosion science and engineering, 10- 9

life-cycle costs of flue gas desulf materials, 10- 50  
 potable water system cleaning with CO<sub>2</sub>, 5- 21

protective coatings—progress projection, 11- 9

review cath prot of steel-reinf concrete, 12- 12

RP0187-87—design CP of steel-reinf concrete, 12- 53

zinc-sprayed coating on concrete for CP, 12- 22

**Edge Effects:** 20-y tests hot dip Al, Zn, AlZn steel, 7- 37

**EDUCATION**

impact of corrosion science and engineering, 10- 9

NACE cathodic protection educ programs, 10- 75

protective coatings—progress projection, 11- 9

schools with instruction in corrosion, 10- 63

steel-reinforced concrete status review, 12- 9

**Elastomeric Coatings:** metal sheathing for splash zone prot, 9- 23

**Electrical Communic Equip:** copper in modern corrosion research, 4- 9

**Electrical Insulation:** cast, CP on offshore struct, 11- 22

**Electrical Transmission Equipment:** coating vapor attack on Cd-plated metals, 8- 32

**ELECTRICITY GENERATION EQUIPMENT**

acoustical tests of casing in wells, 6- 53

copper alloys vs seawater—use guidelines, 9- 12

nitrogen inhib distribution in steam, water, 3- 30

seawater corrosion—summary and review, 9- 9

**Electricity Utilities:** nitrogen inhib distribution in steam, water, 3- 30

**Electrochemical Causes:** sulfite controls for boiler feedwater, 3- 41

**ELECTROCHEMICAL TESTING**

computer calc rates, electrochem data, 7- 52

alloy equivalent weight calc methods, 12- 51

**Electrodes:** steel-rein concrete status review, 12- 9

**ELECTRODES, WELDING**

anodic prot vs alkaline kraft pulping, 4- 31

duplex SS pipelines vs cold seawater, 2- 49

NiCrMoWo lining for flue gas stacks, 12- 11

nickel steels in arctic petroleum service, 10- 46

**Electroendoosmosis:** H<sub>2</sub> absorption pretensioned steel tendons, 12- 32

**Electromagnetic Pipeline Internal Testing:** field experience data on pipeline coating, 11- 28

**ELECTRON MICROSCOPES**

acid rain attack on limestone, 11- 47

heat treat vs SCC of 7000 aluminum alloys, 6- 45

H<sub>2</sub> absorption pretensioned steel tendons, 12- 32

inhibitors for Al 7075 in chloride solutions, 6- 42

metals atmos attack vs shelter, orientation, 7- 25

metals vs microbes in 70 C water, 2- 35

SCC of brass electrical connectors, 7- 20

sulfide stress cracking—low-alloy steels, 2- 9

tannin-based conversion coatings data, 11- 35

**Electron, Effects:** O<sub>2</sub> scaveng catalysts and inhib, 8- 48

**ELECTRONIC EQUIPMENT**

copper in modern corrosion research, 4-9  
impact of corrosion science and engineering, 10-9

**Electroosmosis:** environ attack on reinf conc, 12-79

**Ellipsometric Testing:** copper in modern corros res, 4-9

**Environmental Effects:** environ infl on corros, 1-11

**EPOXIES, COATINGS**

field experience data on pipeline coatings, 11-28  
RP0187-87—design CP of steel-reinf concrete, 12-53

**Epoxy Materials:** polymers resist to hot-wet chlorine, 1-16

**EOXY THICK FILM COATINGS**

Al wire properties infl vs atmospheric attack, 5-50  
cast iron pipe underground corrosion, 5-42  
coatings, cath prot on offshore structures, 11-22

**ERRATA**

Erratum—additives for steam, water cycles, 5-55

Erratum—N use to protect FeCrNiMo alloys, 10-29

**Exfoliation:** heat treat vs SCC of 7000 Al, 6-45

**Exothermic Heat:** H<sub>2</sub>SO<sub>4</sub> attack mech in rail cars, 11-41

**Expert Systems:** boundary element anal offshore CP, 2-23

**External Coatings:** application to concrete, 12-82

**Extrusion Application Of Coatings:** field experience data on pipeline coatings, 11-28

**FABRICATION**

paper mill suction roll perform predictions, 10-30  
low-Ni nonmagnetic well drill collar alloy, 9-50

**FATIGUE**

copper alloys vs seawater—use guidelines, 9-12  
copper cladding on steel welding methods, 11-17

corrosion fatigue—basics, 1-63

fretting phenomena fundamentals, 3-79

paper mill suction roll fatigue tests, 4-37

paper mill suction roll perform predictions, 10-30

**Fatty Acids:** T-6G-22—surf prep contam steel, 3-49

**FERRIC CHLORIDE TEST**

FeCl<sub>3</sub> test modification vs nickel alloys, 3-37

N alloying of FeCrNiMo process alloys, 6-18

nickel steels in arctic petroleum service, 10-46

**Ferric Sulfate:** AISI 306, 309 welds vs polythionic acids, 8-9

**Fiber-Rein Coating:** field data on pipeline, 11-28

**Fiber-Rein Plastic Pipes:** USTs—EPA stance, 8-80

**FIBER-REINFORCED POLYMERS**

polymers resistant to hot-wet chlorine, 1-16

underground storage tanks—EPA stance, 8-80

**FIBERS**

impact of corrosion science and engineering, 10-9

polymers resistant to hot-wet chlorine, 1-16

**Filiform attack:** filiform corros characterization, 4-73

 **FILMS AND SCALES ON MATERIALS**

acoustical tests of casing in wells, 6-53

copper alloys vs seawater—use guidelines, 9-12

corrosion reactions under boiler deposits, 5-29

flue gas cyclic reheat exchangers—Part 3, 4-44

geothermal well drill protection, 8-34

high-Cr steels vs 600 to 650 C coal combustion, 6-9

H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11-41

inhibitors for Al 7075 in chloride solution, 8-42

metals atmos attack vs shelter, orientation, 7-25

organics vs cooling water low pH excursions, 5-11

polymeric alkaline corrosion inhibitors, 4-17

potable water system cleaning with CO<sub>2</sub>, 5-21

silicon-alloyed stainless steel vs O<sub>2</sub>, 1-49

**Filters:** pressure vessel design vs corrosion, 1-29

**Filtration, Lab Testing:** bio attack in cooling water, 5-34

**FIRE RETARDANTS**

ammonium sulfite vs wood copper piping, 2-45

pressure vessel design vs corrosion, 1-29

**Firebreak, Oil Recovery:** well corros, 2-16

**FITTINGS, PIPE**

Al wire properties infl vs atmospheric attack, 5-50

cast iron pipe underground corrosion, 5-42

**FLAME-SPRAYED METAL COATINGS**

CP of Al-coated steel in seawater, 6-29  
flame-sprayed Al on steel in seawater, 9-35  
metal sheathing for splash zone protection, 9-23  
zinc-sprayed coating on concrete for CP, 12-22

**Flame Surf Prep:** T-6G-22—surf prep contam steel, 3-49

**FLUORIDES**

flue gas cyclic reheat exchangers—Part 3, 4-44  
process, environmental infl on corrosion, 1-11

**Fluorocarbon Coatings:** flue gas cyclic reheat exchangers—Part 3, 4-44

**Formaldehyde Biocide:** microbial attack monitoring at Prudhoe, 9-42

**FOULING EFFECTS**

copper alloys vs seawater—use guidelines, 9-12  
copper cladding on steel welding methods, 11-17  
potable water system cleaning with CO<sub>2</sub>, 5-21

**FRACTOGRAPHIC TESTS**

computer-assisted tomography of steel, 12-46  
duplex SS pipelines vs cold seawater, 2-49  
H stress cracking failure—amine absorbers, 8-18  
H<sub>2</sub> absorption pretensioned steel tendons, 12-32  
heat treat vs SCC of 7000 aluminum alloys, 6-45  
paper mill suction roll perform predictions, 10-30  
sulfide stress cracking—low-alloy steels, 2-9

**FRACTURE**

duplex SS pipelines vs cold seawater, 2-49  
H stress cracking failure—amine absorbers, 8-18  
nickel steels in arctic petroleum service, 10-46

**Friction:** fretting phenomena fundamentals, 3-79

**FUMES OR VAPORS**

application of coatings to concrete, 12-82  
coating vapor attack on Cd-plated metals, 8-32

**Furan Materials:** prop of precast polymer conc, 12-29

**Galling:** copper alloys vs seawater—use guidelines, 9-12

**GALVANIC ANODE EFFICIENCY**

calculating magnesium anode efficiency, 8-14

RP0387-87—cast CP anodes for offshore, 9-55

**GALVANIC CELLS**

atmospheric corrosion—80 years of study, 7-9  
cast iron pipe underground corrosion, 5-42  
cathodic prot results on auto bodies, 7-82  
copper alloys vs seawater—use guidelines, 9-12  
metal sheathing for splash zone protection, 9-23  
pressure vessel design vs corrosion, 1-29  
RP0187-87—design CP of steel-reinf conc, 12-53  
SS cladding wastage in recovery boilers, 11-53

**GALVANIC SYSTEMS, CATHODIC PROTECTION**

boundary element anal offshore cath prot, 2-23  
calculating magnesium anode efficiency, 8-14  
cathodic prot results on auto bodies, 7-82  
coatings, cath prot on offshore structures, 11-22  
CP of Al-coated steel in seawater, 6-29  
review cath prot of steel-reinf conc, 12-12  
RP0187-87—design CP of steel-reinf conc, 12-53  
RP0387-87—cast CP anodes for offshore, 9-55

**GALVANIZED STEEL**

atmospheric corrosion—80 years of study, 7-9  
metals atmos attack vs shelter, orientation, 7-25  
potable water system cleaning with CO<sub>2</sub>, 5-21  
RP0187-87—design CP of steel-reinf conc, 12-53

**Galvanostatic Testing:** flame-sprayed Al on steel in seawater, 9-35

**Gas Repressing, Petro Wells:** enhanced oil recovery well corrosion controls, 2-16

**GAS SCRUBBERS**

life-cycle costs of flue gas desulf materials, 10-50  
properties of precast polymer concrete, 12-29

**Gases:** geothermal well drill protection, 8-34

**GASKETS**

acoustical tests of casing in wells, 6-53

Disc—proc envir changes influence, 6-44

**GEOMETRICAL EFFECTS**

acid rain effects on carbonate stones, 7-33

boundary element anal offshore cath prot, 2-23

coatings, cath prot on offshore structures, 11-22

heat treat vs SCC of 7000 aluminum alloys, 6-45

H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11-41

RP0387-87—cast CP anodes for offshore, 9-55

SS cladding wastage in recovery boilers, 11-53

**GEOTHERMAL ENERGY SOURCES**

acoustical tests of casing in wells, 6-53

geothermal well drill protection, 8-34

**GLASS**

alloys to contain radioactive waste, 2-40

Disc—proc envir changes influence, 6-44

flue gas cyclic reheat exchangers—Part 3, 4-44

H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11-41

polymers resistant to hot-wet chlorine, 1-16

toxicity reduction by glass, metal containers, 2-46

**GRAIN EFFECTS**

AISI 308, 309 welds vs polythionic acids, 8-9

cavitation fundamentals, 6-67

silicon-alloyed stainless steel vs O<sub>2</sub>, 1-49

thermal effects on CrNiMo duplex pipe, 8-25

**GRAIN, MATERIALS**

calorimetric tests of PM Al 7000 alloys, 6-37

polymeric alkaline corrosion inhibitors, 4-17

**Graphite:** mixed acids vs nickel-based alloys, 10-17

**Graphitization:** cast iron pipe underground corros, 5-42

**Grease:** flue gas cyclic reheat exchangers—Part 3, 4-44

**Groundbeds:** boundary element anal offshore CP, 2-23

**Half-Cells:** pipe-to-soil IR drop compensat meas, 10-38

**Halogens:** polymers resistant to hot-wet chlorine, 1-16

**Hand Tools:** T-6G-22 surf prep contam steel, 3-49

**Handbooks:** cast iron pipe underground corrosion, 5-42

**HARDNESS**

duplex SS pipelines vs cold seawater, 2-49

H stress cracking failure—amine absorbers, 8-18

heat treat vs SCC of 7000 aluminum alloys, 6-45

nickel steels in arctic petroleum service, 10-46

polymers resistant to hot-wet chlorine, 1-16

sulfide stress cracking—low-alloy steels, 2-9

**HASTELLOYS**

alloys to contain radioactive waste, 2-40

FeCl<sub>3</sub> test modification vs nickel alloys, 3-37

flue gas cyclic reheat exchangers—Part 3, 4-44

life-cycle costs of flue gas desulf materials, 10-50

mixed acids vs nickel-based alloys, 10-17

NiCrMoWoCo lining for flue gas stacks, 11-11

**HEAT-AFFECTED ZONES**

boiler tube fabrication stress cells effects, 5-17

copper cladding on steel welding methods, 11-17

duplex SS pipelines vs cold seawater, 2-49

H stress cracking failure—amine absorbers, 8-18

hydrogen effects on steel, 1-38

intergran attack Alloy 600 in nuclear reactors, 3-18

organics vs cooling water low pH excursions, 5-11

potable water system cleaning with CO<sub>2</sub>, 5-21

seawater corrosion—summary and review, 9-9

SS cladding wastage in recovery boilers, 11-53

sulfide controls for boiler feedwater, 3-41

**Heat Flux:** corrosion reactions under boiler deposits, 5-29

**Heat Transfer:** Cu alloys vs seawater—use guides, 9-12

**HEAT TREATMENT**

AISI 308, 309 welds vs polythionic acids, 8-9

calorimetric tests of PM Al 7000 alloys, 6-37

Disc—sulfide stress cracking on two steels, 7-54

heat treat vs SCC of 7000 aluminum alloys, 6-45

impact of corrosion science and engineering, 10-9

intergran attack Alloy 600 in nuclear reactors, 3-18

N alloying of FeCrNiMo process alloys, 6-18

nickel steels in arctic petroleum service, 10-46

paper mill suction roll fatigue tests, 4-37

RP0387-87—cast CP anodes for offshore, 9- 55  
 SCC of precipitation-hardening stainless, 2- 29  
 silicon-alloyed stainless steel vs O<sub>2</sub>, 1- 49  
 slow strain rate, NACE TM0177 compared, 10- 42  
 test of CF-3M steels to selective attack, 4- 26  
 thermal effects on CrNiMo duplex pipe, 8- 25

#### HEATING EFFECTS

H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11- 41  
 O<sub>2</sub> scavenging catalysts and inhibition, 8- 48  
 thermal effects on CrNiMo duplex pipe, 8- 25

**HIGH-PURITY Water vs:** tannin-based conversion coatings data, 11- 35

#### HIGH TEMPERATURES

acoustical tests of casing in wells, 6- 53  
 field experience data on pipeline coatings, 11- 28  
 geothermal well drill protection, 8- 34  
 impact of corrosion science and engineering, 10- 9  
 low-Ni nonmagnetic well drill collar alloy, 9- 50  
 polymers resistant to hot-wet chlorine, 1- 16  
 process, environmental infl. on corrosion, 1- 11

**Hot Dip Metal Coatings:** 20-y tests Al, Zn, AlZn, 7- 37

#### HUEY TESTS

AISI 308, 309 welds vs polythionic acids, 8- 9  
 silicon-alloyed stainless steel vs O<sub>2</sub>, 1- 49

#### HUMID ATMOSPHERES

application of coatings to concrete, 12- 82  
 atmospheric corrosion factors, 8- 79  
 tannin-based conversion coatings data, 11- 35

**Hydraulic Elevators:** USTs—EPA stance, 8- 80

#### HYDROCHLORIC ACIDS

high-Cr steels vs 600 to 650 C coal combustion, 6- 9  
 polymers resistant to hot-wet chlorine, 1- 16  
 process, environmental infl. on corrosion, 1- 11

**Hydrofluoric Acids:** mixed acids vs Ni-based alloys, 10- 17

#### HYDROGEN EMBRITTLEMENT

computer-assisted tomography of steel, 12- 46  
 corrosion reactions under boiler deposits, 5- 29  
 environmental attack on reinforced concrete, 12- 79  
 H stress cracking failure—amine absorbers, 8- 18  
 H<sub>2</sub> absorption pretensioned steel, 12- 32  
 hydrogen effects on steel, 1- 38  
 hydrogen embrittlement fundamentals, 2- 71  
 sulfide stress cracking—low-alloy steels, 2- 9

**Hydrogen Fluoride:** hydrogen effects on steel, 1- 38

#### HYDROGEN, ATOMIC

acid rain attack on limestone, 11- 47  
 acid rain effects on carbonate stones, 7- 33  
 computer-assisted tomography of steel, 12- 46  
 corrosion reactions under boiler deposits, 5- 29  
 H stress cracking failure—amine absorbers, 8- 18  
 H<sub>2</sub> absorption pretensioned steel tendons, 12- 32  
 hydrogen effects on steel, 1- 38  
 hydrogen embrittlement fundamentals, 2- 71

#### HYDROGEN, CAUSES

coatings, cath prot on offshore structures, 11- 22  
 corrosion reactions under boiler deposits, 5- 29  
 heat treat vs SCC of 7000 aluminum alloys, 6- 45  
 hydrogen effects on steel, 1- 38  
 H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11- 41  
 pipe-to-soil IR drop compensating measures, 10- 38  
 review cath prot of steel-reinf concrete, 12- 12

#### HYDROGEN SULFIDE

Dissulfide stress cracking on two steels, 7- 54  
 duplex SS pipelines vs cold seawater, 2- 49  
 field experience data on pipeline coatings, 11- 28  
 geothermal well drill protection, 8- 34  
 H stress cracking failure—amine absorbers, 8- 18  
 hydrogen effects on steel, 1- 38  
 microbial attack monitoring at Prudhoe, 9- 42  
 O<sub>2</sub> scavenging catalysts and inhibition, 8- 48  
 slow strain rate, NACE TM0177 compared, 10- 42  
 sulfide stress cracking—low-alloy steels, 2- 9

**Hydrostatic Testing:** arctic environ vs petro refin, 8- 53

**Hydroxides:** tannin-based conversion coat data, 11- 35

**Hydroxy Ethylenediphosphonic Acid:** chlorine decomposition of HEDP, 10- 24

**Igneous Stone:** acid depos atmos effects on mater, 7- 12

#### IMMERSION LAB TESTING

calorimetric tests of PM Al 7000 alloys, 6- 37  
 flame-sprayed Al on steel in seawater, 9- 35  
 heat treat vs SCC of 7000 aluminum alloys, 6- 45  
 inhibitors for Al 7075 in chloride solution, 8- 42  
 N alloying of FeCrNiMo process alloys, 6- 18  
 tannin-based conversion coatings data, 11- 35

#### IMPACT LABORATORY TESTS

H stress cracking failure—amine absorbers, 8- 18  
 nickel steels in arctic petroleum service, 10- 46

**Impedance Tests:** alloy equiv wt calc methods, 12- 51

#### IMPINGEMENT

cavitation fundamentals, 6- 67  
 copper alloys vs seawater—use guidelines, 9- 12  
 erosion-corrosion fundamentals, 5- 81  
 life-cycle costs of flue gas desulf materials, 10- 50

**Impregnation:** RP0187-87—design CP of steel-reinf concrete, 12- 53

#### IMPOSED CURRENT CATHODIC PROTECTION

boundary element anal offshore cath prot, 2- 23  
 cathodic prot results on auto bodies, 7- 82  
 coatings, cath prot on offshore structures, 11- 22  
 mixed metal oxide anode characteristics, 7- 45  
 review cath prot of steel-reinf concrete, 12- 12  
 RP0187-87—design CP of steel-reinf concrete, 12- 53  
 zinc-sprayed coating on concrete for CP, 12- 22

#### INCLUSIONS

computer-assisted tomography of steel, 12- 46  
 H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11- 41  
 RP0387-87—cast CP anodes for offshore, 9- 55

#### INCOLYOYS

alloys to contain radioactive waste, 2- 40  
 flue gas cyclic reheat exchangers—Part 3, 4- 44  
 life-cycle costs of flue gas desulf materials, 10- 50

#### INDUSTRIAL ATMOSPHERES

acid rain attack on limestone, 11- 47  
 atmospheric corrosion—80 years of study, 7- 9

#### INDUSTRIAL ATMOSPHERIC ON-SITE TESTING

weathering steel rates calculations, 7- 42  
 20-y tests hot dip Al, Zn, AlZn steel, 7- 37

**Industrial Plumbing:** prop of precast polymer conc, 12- 29

**Industrial Waste Control:** concrete resist to sulfate-reducing bacteria, 3- 14

**Industrial-Marine Atmospheric On-Site Testing:** weathering steel rates calculations, 7- 42

#### INERT GAS SHIELD WELDING

duplex SS pipelines vs cold seawater, 2- 49  
 thermal effects on CrNiMo duplex pipe, 8- 25

#### INHIBITORS

acoustical tests of casing in wells, 6- 53  
 Erratum—additives for steam, water cycles, 5- 55  
 copper in modern corrosion research, 4- 9  
 copper plumbing corrosion rate predictions, 3- 9  
 enhanced oil recovery well corrosion controls, 2- 16  
 geothermal well drill protection, 8- 34  
 H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11- 41  
 inhibitors for Al 7075 in chloride solutions, 8- 42  
 organics vs cooling water low pH excursions, 5- 11  
 O<sub>2</sub> scavenging catalyst and inhibition, 8- 48  
 potable water systems—status review, 5- 9  
 RP0187-87—design CP of steel-reinf concrete, 12- 53  
 toxicity reduction by glass, metal containers, 2- 46

**Inorganic Coatings:** tannin-based conversion coatings data, 11- 35

**Inorganic Inhib:** polymeric alkaline corros inhib, 4- 17

**Inorganic-Organic Multiphase Materials:** polymers resistant to hot-wet chlorine, 1- 16

#### INSPECTION

coatings, cath prot on offshore structures, 11- 22  
 field experience data on pipeline coatings, 11- 28  
 hydrogen effects on steel, 1- 38

H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11- 41

NiCrMoWCo lining for flue gas stacks, 11- 11

organics vs cooling water low pH excursions, 5- 11

RP0187-87—design CP of steel-reinf concrete, 12- 53

RP0387-87—cast CP anodes for offshore, 9- 55  
 underground storage tanks—EPA stance, 8- 80

#### INSTANTANEOUS RATE TESTS

alloy equivalent weight calc methods, 12- 51  
 biological attack in cooling water systems, 5- 35  
 review cath prot of steel reinf concrete, 12- 12

#### INSTRUMENTATION, TEST

duplex SS pipelines vs cold seawater, 2- 49  
 environmental attack on reinforced concrete, 12- 79  
 intergran attack Alloy 600 in nuclear reactors, 3- 18  
 paper mill suction roll perform predictions, 10- 30  
 polymers resistant to hot-wet chlorine, 1- 16  
 RP0187-87—design CP of steel-reinf concrete, 12- 53

**Interference:** boundary element anal offshore CP, 2- 23

#### INTERGRANULAR CRACKING

AISI 308, 309 welds vs polythionic acids, 8- 9  
 calorimetric tests of PM Al 7000 alloys, 6- 37  
 SCC of brass electrical connectors, 7- 20

#### INTERGRANULAR EFFECTS

intergran attack Alloy 600 in nuclear reactors, 3- 18  
 low-Ni nonmagnetic well drill collar alloy, 9- 50  
 mixed acids vs nickel-based alloys, 10- 17  
 sulfide stress cracking—low-alloy steels, 2- 9  
 test of CF-3M steels to selective attack, 4- 26

#### INTERNAL ATTACK, PIPELINES

AI wire properties infl vs atmospheric attack, 5- 50  
 cast iron pipe underground corrosion, 5- 42

**Ion Exchange:** potable water cleaning with CO<sub>2</sub>, 5- 21

#### IONIC EFFECTS

acid deposition atmos effects on materials, 7- 12  
 alloys to contain radioactive waste, 2- 40  
 chlorine decomposition of HEDP, 10- 24  
 copper plumbing corrosion rate predictions, 3- 9  
 tannin-based conversion coatings data, 11- 35

**Iron Sulfates:** H<sub>2</sub>SO<sub>4</sub> attack mech in rail cars, 11- 41

**Isolation Packaging:** coating vapor attack on Cd-plated metals, 8- 32

**Isotopic Lab Testing:** CAT of steel, 12- 46

**Joints:** metal sheathing for splash zone prot, 9- 23

#### KRAFT PROCESS, PAPER INDUSTRY

anodic prot vs alkaline kraft pulping, 4- 31  
 SS cladding wastage in recovery boilers, 11- 53

**Laminates:** polymers resistant to hot-wet chlorine, 1- 16

**Laser Testing:** acid rain effects on carbonate stones, 7- 33

**Leaching:** acid rain effects on carbonate stones, 7- 33

#### LEAD

coatings, cath prot on offshore structures, 11- 22  
 potable water systems—status review, 5- 9  
 protective coatings—progress projection, 11- 9  
 20-y tests hot dip Al, Zn, AlZn steel, 7- 37

#### LEAKS

cast iron pipe underground corrosion, 5- 42  
 flue gas cyclic reheat exchangers—Part 3, 4- 44  
 H stress cracking failure—amine absorbers, 8- 18  
 underground storage tanks—EPA stance, 8- 80

#### LININGS

application of coatings to concrete, 12- 82  
 copper alloys vs seawater—use guidelines, 9- 12  
 H stress cracking failure—amine absorbers, 8- 18  
 H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11- 41  
 life-cycle costs of flue gas desulf materials, 10- 50  
 NiCrMoWCo lining for flue gas stacks, 11- 11  
 pressure vessel design vs corrosion, 1- 29  
 properties of precast polymer concrete, 12- 29  
 underground storage tanks—EPA stance, 8- 80

#### LOW TEMPERATURES

arctic environments vs petroleum refineries, 8- 53  
 duplex SS pipelines vs cold seawater, 2- 49  
 field experience data on pipeline coatings, 11- 28  
 microbial attack monitoring at Prudhoe, 9- 42

#### MAGNESIUM

calculating magnesium anode efficiency, 8- 14  
 low-Ni nonmagnetic well drill collar alloy, 9- 50  
 potable water system cleaning with CO<sub>2</sub>, 5- 21

**MAGNETIC EFFECTS**  
impact of corrosion science and engineering, 10- 9  
low-Ni nonmagnetic well drill collar alloy, 9- 50  
 $O_2$  scavenging catalysts and inhibition, 8- 48

**Magnetic Particle Tests:** H stress cracking failure—amine absorbers, 8- 18

**Manganese:** low-Ni nonmagnetic well drill collar, 9- 50

**MARINE ATMOSPHERES**  
atmospheric corrosion—80 years of study, 7- 9  
economic impact of concrete corrosion, 12- 78  
marine environments characterization, 9- 69  
marine environments corrosion, 10- 81  
review cath prot of steel-rein concrete, 12- 12  
weathering steels rate calculations, 7- 42  
20-y tests hot dip Al, Zn, AlZn steel, 7- 37

**Masonry:** acid rain effects on carbonate stones, 7- 33

**Mass Transfer:** slurry pipeline eros-corros control, 12- 41

**Melting, Coatings Application:** field experience data on pipeline coating, 11- 28

**Mercury Embrittlement:** corrosion reactions under boiler deposits, 5- 29

**Mesh Anodes:** review CP of steel-rein conc, 12- 12

**METAL COATINGS**  
AISI 308, 309 welds vs polythionic acids, 8- 9  
cathode prot results on auto bodies, 7- 82  
hydrogen embrittlement fundamentals, 2- 71  
metal sheathing for splash zone protection, 9- 23  
NiCrMoWC<sub>2</sub> lining for flue gas stacks, 11- 11  
pressure vessel design vs corrosion, 1- 29  
SS cladding wastage in recovery boilers, 11- 53  
zinc-sprayed coating on concrete for CP, 12- 22

**METAL OXIDE ANODES**  
mixed metal oxide anode characteristics, 7- 45  
review cath prot of steel-rein concrete, 12- 12

**METAL PIPES**  
ammonium sulfate vs wood, copper piping, 2- 45  
boiler tube fabrication stress cells effects, 5- 17  
copper in modern corrosion research, 4- 9  
corrosion reactions under boiler deposits, 5- 29  
duplex SS pipelines vs cold seawater, 2- 49  
field experience data on pipeline coatings, 11- 28  
geothermal well drill protection, 8- 34  
hydrogen effects on steel, 1- 38  
life-cycle costs of flue gas desulf materials, 10- 50  
potable water systems—status review, 5- 9  
potable water system cleaning with  $CO_2$ , 5- 21  
slow strain rate, nace TM0177 compared, 10- 42  
slurry pipeline erosion-corrosion control, 12- 41  
SS cladding wastage in recovery boilers, 11- 53  
sulfite controls for boiler feedwater, 3- 41  
thermal effects on CrNiMo duplex pipe, 8- 25  
underground storage tanks—EPA stance, 8- 80

**Metal-Metal, Multiphase Coatings:** CP of Al-coated steel in seawater, 6- 29

**METALLURGICAL FACTORS**  
low-Ni nonmagnetic well drill collar alloy, 9- 50  
RP0387-87—cast CP anodes for offshore, 9- 55  
SCC of brass electrical connectors, 7- 20

**MICROORGANISMS**  
metals vs microbes in 70 C water, 2- 35  
toxicity reduction by glass, metal containers, 2- 46

**MICROSCOPIC TESTING**  
microbial attack monitoring at Prudhoe, 9- 42  
silicon-alloyed stainless steel vs  $O_2$ , 1- 49

**MICROSTRUCTURE, METALS**  
heat treat vs SCC of 7000 aluminum alloys, 6- 45  
SCC of brass electrical connectors, 7- 20  
sulfide stress cracking—low-alloy steels, 2- 9  
thermal effects on CrNiMo duplex pipe, 8- 25

**MOLten SALTS**  
process, environmental infl on corrosion, 1- 11  
SS cladding wastage in recovery boilers, 11- 53

**MOLYBDENUM**  
alloys to contain radioactive waste, 2- 40  
sulfide stress cracking—low-alloy steels, 2- 9

**Mortar, Concrete:** disc— $O_2$  diffusion through conc, 5- 34

**Mortars, Inorganic, Organic—Not Hydraulic Concrete:** acid deposition atmos effects on materials, 7- 12

**Mud:** mixed metal oxide anode characteristics, 7- 45

**Multiphase Pipes:** SS cladding wastage in recovery boilers, 11- 53

**NACE Publications, Miscellaneous:** corrosion control data acquisition, use, 4- 55

**NACE Hydrogen Sulfide Cracking Test:** H stress cracking failure—amine absorbers, 8- 18

**NACE STANDARDS AND REPORTS**  
computer-assisted tomography of steel, 12- 46  
pipeline CP—NACE reviews criteria, 7- 73  
RP0187-87—design CP of steel-rein concrete, 12- 53  
RP0387-87—cast CP anodes for offshore, 9- 55  
slow strain rate, NACE TM0177 compared, 10- 42  
steel-reinforced concrete status review, 12- 9  
underground storage tanks—EPA stance, 8- 80

**NACE TEST METHODS**  
computer-assisted tomography of steel, 12- 46  
nickel steels in arctic petroleum service, 10- 46

**National Bureau Of Standards:** corrosion control data acquisition, use, 4- 55

**Natural Gas:** USTS—EPA stance, 8- 80

**Navy Regs:** seawater corros—summary/review, 9- 9

**Neodymium:** inhibitors for Al 7075 in chloride solut, 8- 42

**NICKEL**  
inhibitors for Al 7075 in chloride solutions, 8- 42  
metal sheathing for splash zone protection, 9- 23

**NICKEL ALLOYS**  
FeCl<sub>3</sub> test modification vs nickel alloys, 3- 37  
mixed acids vs nickel-based alloys, 10- 17

**NICKEL-COPPER ALLOYS**  
copper cladding on steel welding methods, 11- 17  
H stress cracking failure—amine absorbers, 8- 18  
low-Ni nonmagnetic well drill collar alloy, 9- 50  
metal sheathing for splash zone protection, 9- 23

**NIMONIC**  
Disc—SCC-H<sub>2</sub> embrit nonmagnetic alloys, 2- 39  
flue gas cyclic reheat exchangers—Part 3, 4- 44

**NIOBIUM**  
AISI 308, 309 welds vs polythionic acids, 8- 9  
mixed metal oxide anode characteristics, 7- 45  
review cath prot of steel-rein concrete, 12- 12  
sulfide stress cracking—low-alloy steels, 2- 9

**NITRATES**  
biological attack in cooling water systems, 5- 34  
flue gas cyclic reheat exchangers—Part 3, 4- 44

**NITRIC ACIDS**  
acid rain attack on limestone, 11- 47  
mixed acids vs nickel-based alloys, 10- 17  
silicon-alloyed stainless steel vs  $O_2$ , 1- 49

**Nitrides, Refractories:** Si-alloyed SS vs  $O_2$ , 1- 49  
**Nitriding:** thermal effects on CrNiMo duplex pipe, 8- 25

**NITRITE INHIBITORS**  
biological attack in cooling water systems, 5- 34  
geothermal well drill protection, 8- 34  
slurry pipeline erosion-corrosion control, 12- 41

**Nitrates:** copper in modern corrosion research, 4- 9

**NITROGEN INHIBITORS**  
geothermal well drill protection, 8- 34  
nitrogen inhib distribution in steam, water, 3- 30  
 $O_2$  scavenging catalysts and inhibition, 8- 48

**NITROGEN**  
acid rain attack on limestone, 11- 47  
Disc—SCC-H<sub>2</sub> embrit nonmagnetic alloys, 2- 39  
Erratum—N use to protect FeCr NiMo alloys, 10- 29  
low-Ni nonmagnetic well drill collar alloy, 9- 50  
N alloying of FeCrNiMo process alloys, 6- 18

**NITROUS OXIDE**  
acid rain attack on limestone, 11- 47  
copper in modern corrosion research, 4- 9

**Nondestructive Testing : CAT of steel, 12- 46**

**NONMETAL PIPES**  
cast iron pipe underground corrosion, 5- 42

**polymers resistant to hot-wet chlorine, 1- 16**  
**potable water systems—status review, 5- 9**

**NUCLEAR GRADE STAINLESS STEEL**  
flue gas cyclic reheat exchangers—Part 3, 4- 44  
life-cycle costs of flue gas desulf materials, 10- 50  
mixed acids vs nickel-based alloys, 10- 17

**NUCLEAR REACTORS**  
Erratum—additives for steam, water cycles, 5- 55  
intergranular attack Alloy 600 in nuclear reactors, 3- 18  
nitrogen inhib distribution in steam, water, 23- 36

**Nuclear Waste Mixtures:** Cu in modern corros res, 4- 9

**OFFSHORE PETROLEUM WELLS**  
boundary element anal offshore cath prot, 2- 23  
coatings, cath prot on offshore structures, 11- 22  
copper cladding on steel welding methods, 11- 17  
copper in modern corrosion research, 4- 9  
CP of Al-coated steel in seawater, 6- 29  
flame-sprayed Al on steel in seawater, 9- 35  
marine environments corrosion, 10- 81  
metal sheathing for splash zone protection, 9- 23  
seawater corrosion—summary and review, 9- 9

**Offshore Platforms, Tethered Tension Leg:** coatings, cath prot on offshore structures, 11- 22

**Oils:** T-6G-22—surf prep contaminated steel, 3- 49

**ON-SITE OR PILOT PLANT TESTING**  
acid deposition atmos effects on materials, 7- 12  
acid rain attack on limestone, 11- 47  
acid rain effects on carbonate stones, 7- 33  
acoustical tests of casing in wells, 6- 53  
alloy equivalent weight calc methods, 12- 51  
alloys to contain radioactive waste, 2- 40  
anodic prot vs alkaline kraft pulping, 4- 31  
cathode prot results on auto bodies, 7- 82  
chlorine decomposition of HEDP, 10- 24  
coatings, cath prot on offshore structures, 11- 22  
copper alloys vs seawater—use guidelines, 9- 12  
field experience data on pipeline coatings, 11- 28  
flue gas cyclic reheat exchangers—Part 3, 4- 44  
metals atmos attack vs shelter, orientation, 7- 25  
polymeric alkaline corrosion inhibitors, 4- 17  
polymers resistant to hot-wet chlorine, 1- 16  
review cath prot of steel-rein concrete, 12- 12  
tannin-based conversion coatings data, 11- 35

**OPTICAL TESTING**  
inhibitors for Al 7075 in chloride solutions, 8- 42  
review cath prot of steel-rein concrete, 12- 12  
T-6G-22—surf prep contaminated steel, 3- 49

**ORGANIC COATINGS**  
characteristics of protective coatings, 11- 79  
coatings, cath prot on offshore structures, 11- 22  
 $H_2SO_4$  attack mechanism in railroad cars, 11- 41  
metal sheathing for splash zone protection, 9- 23  
protective coatings—progress projection, 11- 9  
RP0187-87—design CP of steel-rein concrete, 12- 53  
tannin-based conversion coatings data, 11- 35

**ORGANIC INHIBITORS**  
organics vs cooling water low pH excursions, 5- 11  
polymeric alkaline corrosion inhibitors, 4- 17

**Organics + Cement—Concrete:** properties of precast polymer concrete, 12- 29

**ORIENTATION OF SURFACES**  
acid rain attack on limestone, 11- 47  
metals atmos attack vs shelter, orientation, 7- 25  
review cath prot of steel-rein concrete, 12- 12

**Overpotentials:**  $H_2$  absorb pretens steel tendons, 12- 32  
**Overspray:** zinc-sprayed coating on conc for CP, 12- 22

**Oxalic Acid:** AISI 308, 309 welds vs polythionic acids, 8- 9

**OXIDATION**  
corrosion reactions under boiler deposits, 5- 29  
environmental attack on reinforced concrete, 12- 79  
inhibitors for Al 7075 in chloride solutions, 8- 42  
RP0187-87—design CP of steel-rein concrete, 12- 53  
sulfite controls for boiler feedwater, 3- 41  
tannin-based conversion coatings data, 11- 35

**OXIDES**  
copper alloys vs seawater—use guidelines, 9- 12  
Disc— $O_2$  diffusion through concrete, 5- 34

T-6G-22—surf prep contaminated steel, 3- 48

#### OXYGEN

boundary element anal offshore cath prot, 2- 23  
duplex SS pipelines vs cold seawater, 2- 48  
economic impact of concrete corrosion, 12- 78  
filiform corrosion characterization, 4- 73  
geothermal well drill protection, 8- 34  
metal sheathing for splash zone protection, 9- 23  
mixed metal oxide anode characteristics, 7- 45  
process, environmental infl on corrosion, 1- 11  
review cath prot of steel-reinf concrete, 12- 12  
seawater corrosion—summary and review, 9- 9  
silicon-alloyed stainless steel vs O<sub>2</sub>, 1- 48  
slurry pipeline erosion-corrosion control, 12- 41

#### PAPER INDUSTRY

anodic prot vs alkaline kraft pulping, 4- 31  
paper mill suction roll fatigue tests, 4- 37  
paper mill suction roll perform predictions, 10- 30  
SS cladding wastage in recovery boilers, 11- 53

#### PARTICULATES

acid deposition atmos effects on materials, 7- 12  
biological attack in cooling water systems, 5- 34  
copper alloys vs seawater—use guidelines, 9- 12  
metals atmos attack vs shelter, orientation, 7- 25  
polymeric alkaline corrosion inhibitors, 4- 17  
SCC of brass electrical connectors, 7- 20

#### PASSIVATION

coatings, cath prot on offshore structures, 11- 22  
environmental attack on reinforced concrete, 12- 79  
geothermal well drill protection, 8- 34  
metals vs microbes in 70 C water, 2- 35  
process, environmental infl on corrosion, 1- 11  
silicon-alloyed stainless steel vs O<sub>2</sub>, 1- 49  
slurry pipeline erosion-corrosion control, 12- 41  
tannin-based conversion coatings data, 11- 35

#### PERFORATIONS, COATINGS

coatings, cath prot on offshore structures, 11- 22  
field experience data on pipeline coatings, 11- 28  
pipe-to-soil IR drop compensating measures, 10- 38

#### PERMEATION

characteristics of prot coatings, 11- 79  
H<sub>2</sub> absorption pretensioned steel tendons, 12- 32  
RP0187-87—design CP of steel-reinf concrete, 12- 53

Petroleum: USTs—EPA stance, 8- 80

#### pH

acid deposition atmos effects on materials, 7- 12  
acid rain effects on carbonate stones, 7- 33  
geothermal well drill protection, 8- 34  
organics vs cooling water low pH excursions, 5- 11  
polymeric alkaline corrosion inhibitors, 4- 17  
review cath prot of steel-reinf concrete, 12- 12  
test for erosion-corrosion in slurries, 1- 21

#### pH CHANGES, EFFECTS

acid deposition atmos effects on materials, 7- 12  
application of coatings to concrete, 12- 82  
cathodic prot results on auto bodies, 7- 82  
copper plumbing corrosion rate predictions, 3- 9  
Disc—sulfide stress cracking on two steels, 7- 54  
geothermal well drill protection, 8- 34  
mixed metal oxide anode characteristics, 7- 45  
N alloying of FeCrNiMo process alloys, 6- 18  
nitrogen inhib distribution in steam, water, 3- 30  
organics vs cooling water low pH excursions, 5- 11  
polymeric alkaline corrosion inhibitors, 4- 17  
potable water system cleaning with CO<sub>2</sub>, 5- 21  
review cath prot of steel-reinf concrete, 12- 12  
slurry pipeline erosion-corrosion control, 12- 41  
test for erosion-corrosion in slurries, 1- 21

#### PHASE EFFECTS

AISI 308, 309 welds vs polythionic acids, 8- 9  
sulfide stress cracking—low-alloy steels, 2- 9  
test of CF-3M steels to selective attack, 4- 26  
thermal effects on CrNiMo duplex pipe, 8- 25

#### PHENOLICS

flue gas cyclic reheat exchangers—Part 3, 4- 44  
H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11- 41  
O<sub>2</sub> scavenging catalysts and inhibition, 8- 48  
tannin-based conversion coatings data, 11- 35

#### PHOSPHATE INHIBITORS

chlorine decomposition of HEDP, 10- 24  
organics vs cooling water low pH excursions, 5- 11  
polymeric alkaline corrosion inhibitors, 4- 17  
potable water system cleaning with CO<sub>2</sub>, 5- 21  
slurry pipeline erosion-corrosion control, 12- 41

#### PHOSPHONATE INHIBITORS

chlorine decomposition of HEDP, 10- 24  
geothermal well drill protection, 8- 34  
organics vs cooling water low pH excursions, 5- 11  
polymeric alkaline corrosion inhibitors, 4- 17

**Phosphoric Acid:** mixed acids vs Ni-based alloys, 10- 17

**Phosphorus:** SSC—low-alloy steels, 2- 9

**Piling:** metal sheathing for splash zone prot, 9- 23

#### PIPELINES

field experience data on pipeline coatings, 11- 28  
nickel steels in arctic petroleum service, 10- 46  
pipe-to-soil IR drop compensating measures, 10- 38  
pipeline CP—NACE reviews criteria, 7- 73  
underground storage tanks—EPA stance, 8- 80

#### PITTING

alloys to contain radioactive waste, 2- 40  
cast iron pipe underground corrosion, 5- 42  
copper in modern corrosion research, 4- 9  
corrosion reactions under boiler deposits, 5- 29  
Disc—sulfide stress cracking on two steels, 7- 54  
geothermal well drill protection, 8- 34  
high-Cr steels vs 600 to 650 C coal combustion, 6- 9  
H<sub>2</sub> absorption pretensioned steel tendons, 12- 32  
microbial attack monitoring at Prudhoe, 9- 42  
mixed acids vs nickel-based alloys, 10- 17  
N alloying of FeCrNiMo process alloys, 6- 18  
NiCrMoWCo lining for flue gas stacks, 11- 11  
nickel steels in arctic petroleum service, 10- 46  
review cath prot of steel-reinf concrete, 12- 12  
sulfite controls for boiler feedwater, 3- 41  
thermal effects on CrNiMo duplex pipe, 8- 25

#### PLATINUM

cathodic prot results on auto bodies, 7- 82  
mixed acids vs Ni-based alloys, 10- 17  
mixed metal oxide anode characteristics, 7- 45

**Plutonium:** alloys to contain radioactive waste, 2- 40

#### POISONS

potable water systems—status review, 5- 9  
protective coatings—progress projection, 11- 9  
toxicity reduction by glass, metal containers, 2- 46  
underground storage tanks—EPA stance, 8- 80

#### POLARIZATION EFFECTS

coatings, cath prot on offshore structures, 11- 22  
review cath prot of steel-reinf concrete, 12- 12

#### POLARIZATION RATE TESTS

alloy equivalent weight calc methods, 12- 51  
biological attack in cooling water systems, 5- 34  
computer calc rates, electrochemical data, 7- 52  
CP of Al-coated steel in seawater, 6- 29  
crevice attack tests for welded SS in seawater, 9- 29  
field experience data on pipeline coatings, 11- 28  
flame-sprayed Al on steel in seawater, 9- 35  
high-Cr steels vs 600 to 650 C coal combustion, 6- 9  
H<sub>2</sub> absorption pretensioned steel tendons, 12- 32  
inhibitors for Al 7075 in chloride solutions, 8- 42  
metals vs microbes in 70 C water, 2- 35  
mixed acids vs nickel-based alloys, 10- 17  
N alloying of FeCrNiMo process alloys, 6- 18  
zinc-sprayed coating on concrete for CP, 12- 22

#### POLARIZATION, CAUSES

coatings, cath prot on offshore structures, 11- 22  
copper plumbing corrosion rate predictions, 3- 9  
environmental attack on reinforced concrete, 12- 79  
mixed metal oxide anode characteristics, 7- 45  
pipe-to-soil IR drop compensating measures, 10- 38

#### POLLUTED AQUEOUS ENVIRONMENTS

chemical process industries current status, 1- 4  
copper alloys vs seawater—use guidelines, 9- 12  
geothermal well drill protection, 8- 34  
review cath prot of steel-reinf concrete, 12- 12

**Polluted Atmospheres:** atmos corros—80 y of study, 7- 9

**Polyamides:** field data on pipeline coating, 11- 28

**Polychloroprene:** field data on pipeline coating, 11- 28

**Polyester:** polymers resistant to hot-wet Cl, 1- 16

**Polyester Coatings:** H<sub>2</sub>SO<sub>4</sub> attack mech in rail cars, 11- 41

#### POLYETHYLENE

Al wire properties infl vs atmospheric attack, 5- 50  
cast iron pipe underground corrosion, 5- 42  
coating vapor attack on Cd-plated metals, 8- 32  
field experience data on pipeline coatings, 11- 28  
test for erosion-corrosion in slurries, 1- 21

**Polymer Concrete:** review CP of steel-reinf conc, 12- 12

**Polymeric Concrete Coatings:** field experience data on pipeline coating, 11- 28

#### POLYMERIC INHIBITORS

organics vs cooling water low pH excursions, 5- 11  
polymeric alkaline corrosion inhibitors, 4- 17

#### POLYMERIC MATERIALS

acoustical tests of casing in wells, 6- 53  
potable water systems—status review, 5- 9

**Polyphenylene:** flue gas cyclic reheat—Part 3, 4- 44

#### POLYTHIONIC ACIDS

AISI 308, 309 welds vs polythionic acids, 8- 9  
high-Cr steels vs 600 to 650 C coal combustion, 6- 9

#### POLYVINYLCHLORIDE

cast iron pipe underground corrosion, 5- 42  
field experience data on pipeline coatings, 11- 28  
H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11- 41

**Polyvinylidene Chlorides:** flue gas cyclic reheat exchangers—Part 3, 4- 44

#### POROSITY

application of coatings to concrete, 12- 82  
coatings, cath prot on offshore structures, 11- 22  
mixed metal oxide anode characteristics, 7- 45

**Potable Water:** system cleaning with CO<sub>2</sub>, 5- 21

**Potassium Cl:** low-Ni nonmagnetic well drill collar, 9- 50

**Potassium Ferricyanide Test:** T-6G-22—surf prep contaminated steel, 3- 49

**Potential Tests:** environ attack on reinf conc, 12- 79

#### POTENTIALS

boundary element anal offshore cath prot, 2- 23  
calculating magnesium anode efficiency, 8- 14  
crevice attack tests for welded SS in seawater, 9- 29

flame-sprayed Al on steel in seawater, 9- 35

pipe-to-soil IR drop compensating measures, 10- 38

test for erosion-corrosion in slurries, 1- 21

#### POTENTIODYNAMIC LAB TESTS

crevice attack tests for welded SS in seawater, 9- 29  
inhibitors for Al 7075 in chloride solutions, 8- 42  
tannin-based conversion coatings data, 11- 35

**Potentiometer Testing:** Cu plumb corros rate predict, 3- 9

**Powder Coatings:** field data on pipeline coatings, 11- 28

**Power Tools:** prot coat—progress projection, 11- 9

**Praseodymium:** inhib for Al 7075 in chloride solut, 8- 42

#### PRE-OR POST-STRESSED CONCRETE

application of coatings to concrete, 12- 82

H<sub>2</sub> absorption pretensioned steel tendons, 12- 32

**Precipitation Hardening Steels:** SCC of, 2- 29

#### PRECIPITATION (NOT RAIN) EFFECTS

calorimetric tests of PM Al 7000 alloys, 6- 37

heat treat vs SCC of 7000 aluminum alloys, 6- 45

N alloying of FeCrNiMo process alloys, 6- 18

polymeric alkaline corrosion inhibitors, 4- 17

thermal effects on CrNiMo duplex pipe, 8- 25

#### PREDICTIVE CALCULATIONS

calorimetric tests of PM Al 7000 alloys, 6- 37

environmental attack on reinforced concrete, 12- 79

metal sheathing for splash zone protection, 9- 23

mixed metal oxide anode characteristics, 7- 45

paper mill suction roll perform predictions, 10- 30

review cath prot of steel-reinf concrete, 12- 12

#### PRESSURE

corrosion reactions under boiler deposits, 5- 29

field experience data on pipeline coatings, 11- 28

geothermal well drill protection, 8- 34

hydrogen effects on steel, 1- 38

H stress cracking failure—amine absorbers, 8-18  
microbial attack monitoring at Prudhoe, 9-42  
nitrogen inhib distribution in steam, water, 23-36  
potable water system cleaning with CO<sub>2</sub>, 5-21

**PRESSURE VESSELS**

anodic prot vs alkaline kraft pulping, 4-31  
H stress cracking failure—amine absorbers, 8-18  
pressure vessel design vs corrosion, 1-29

**PRODUCTION, PETROLEUM**

Disc—sulfide stress cracking on two steels, 7-54  
enhanced oil recovery well corrosion, 2-16  
field experience data on pipeline coatings, 11-28  
low-Ni nonmagnetic well drill collar alloy, 9-50  
microbial attack monitoring at Prudhoe, 9-42  
O<sub>2</sub> scavenging catalysts and inhibition, 8-48  
sulfide stress cracking—low-alloy steels, 2-9

**Programs, Computer:** BE anal offshore CP, 2-23

**Propellers:** copper alloys vs seawater—use guidelines, 9-12

**Pumps:** Cu alloys vs seawater—use guidelines, 9-12

**Pylons:** zinc-sprayed coating on conc for CP, 12-22

**QUALITY CONTROL**

environmental attack on reinforced concrete, 12-79  
field experience data on pipeline coatings, 11-28  
hydrogen effects on steel, 1-38

RP0387-87—cast CP anodes for offshore, 9-55

silicon-alloyed stainless steel vs O<sub>2</sub>, 1-49

**RADIATION EFFECTS**

alloys to contain radioactive waste, 2-40  
intergranular attack alloy 600 in nuclear reactors, 3-18

**Railroad Tank Cars:** H<sub>2</sub>SO<sub>4</sub> attack mech in rail cars, 11-41**RAIN CAUSES**

acid deposition atmos effects on materials, 7-12  
acid rain attack on limestone, 11-47  
acid rain effects on carbonate stones, 7-33  
metal atmos attack vs shelter, orientation, 7-25  
pressure vessel design vs corrosion, 1-29  
zinc-sprayed coating on concrete for CP, 12-22

**RATE CALCULATIONS**

acid deposition atmos effects on materials, 7-12  
acoustical tests of casing in wells, 6-53  
alloy equivalent weight calc methods, 12-51  
arctic environments vs petroleum refineries, 8-53  
atmospheric corrosion—80 years of study, 7-9

computer calc rates, electrochem data, 7-52  
copper alloys vs seawater—use guidelines, 9-12  
copper plumbing corrosion rate predictions, 3-9  
CP of Al-coated steel in seawater, 6-29

crevice attack tests for welded SS in seawater, 9-29  
enhanced oil recovery well corrosion, 2-16  
flue gas cyclic reheat exchangers—Part 3, 4-44

H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11-41  
metal sheathing for splash zone protection, 9-23  
metals vs microbes in 70 C water, 2-35

mixed acids vs nickel-based alloys, 10-17  
mixed metal oxide anode characteristics, 7-45  
organics vs cooling water low pH excursions, 5-11

paper mill suction roll perform predictions, 10-30  
polymers resistant to hot-wet chlorine, 1-16  
potable water system cleaning with CO<sub>2</sub>, 5-21

pressure vessel design vs corrosion, 1-29  
silicon-alloyed stainless steel vs O<sub>2</sub>, 1-49  
slow strain rate, NACE TM0177 compared, 10-42

slurry pipeline erosion-corrosion control, 12-41  
tannin-based conversion coatings data, 11-35  
test for erosion-corrosion in slurries, 1-21  
test of CF-3M steels to selective attack, 4-26

weathering steel rate calculations, 7-42  
zinc-sprayed coating on concrete for CP, 12-22  
20-y tests hot dip Al, Zn, AlZn steel, 7-37

**Reactors, Glass:** Disc—proc envir changes infl, 6-44

**RECORDS, DATABASES**

atmospheric corrosion—80 years of study, 7-9  
corrosion control data acquisition, use, 4-55  
geothermal well drill protection, 8-34

organics vs cooling water low pH excursions, 5-11

RP0387-87—cast CP anodes for offshore, 9-55

underground storage tanks—EPA stance, 8-80

**Rectifier Ripple Effect:** mixed metal oxide anode characteristics, 7-45

**Rectifiers:** review cath prot of steel reinf concrete, 12-12

**REDOX, ELECTROCHEMICAL CAUSES**

mixed acids vs nickel-based alloys, 10-17  
O<sub>2</sub> scavenging catalysts and inhibition, 8-48

**Reducing Environment:** N alloying of FeCrNiMo process alloys, 6-18

**REFINERY ELECTRODES**

anodic prot vs alkaline kraft pulping, 4-31  
environmental attack on reinforced concrete, 12-79  
pipe-to-soil IR drop compensating measures, 10-38  
review cath prot of steel-reinf concrete, 12-12  
RP0187-87—design CP of steel-reinf conc, 12-53

**Refining:** arctic envir vs petroleum refineries, 8-53

**REFRACTORIES**

arctic environments vs petroleum refineries, 8-53  
protective coatings—progress projection, 11-9

**REPAIRS**

Disc—proc envir changes influence, 6-44  
economic impact of concrete corrosion, 12-78  
field experience data on pipeline coating, 11-28  
review cath prot of steel-reinf concrete, 12-12  
underground storage tanks—EPA stance, 8-80

**Repassivation:** crevice attack tests for welded SS in seawater, 9-29

**Represuring:** enhanced oil recovery well corros, 2-16

**RESEARCH PROJECTS**

impact of corrosion science and engineering, 10-9  
steel-reinforced concrete status review, 12-9

**RESIDUAL STRESSES**

boiler tube fabrication stress cells effects, 5-17  
paper mill suction roll fatigue tests, 4-37  
SCC of brass electrical connectors, 7-20

**RESISTANCE, ELECTRICAL**

environmental attack on reinforced concrete, 12-79  
pipe-to-soil IR drop compensating measures, 10-38  
pipeline CP—NACE reviews criteria, 7-73  
zinc-sprayed coating on concrete for CP, 12-22

**Resistivities, Underground:** pipe-to-soil IR drop compensating measures, 10-38

**RESISTIVITY, ELECTRICAL**

biological attack in cooling water systems, 5-35  
calculating magnesium anode efficiency, 8-14

**REVIEWS**

chemical process industries current status, 1-9  
copper in modern corrosion research, 4-9  
corrosion control data acquisition, use, 4-55  
field experience data on pipeline coatings, 11-28  
impact of corrosion science and engineering, 10-9  
potable water systems—status review, 5-9  
review cath prot of steel-reinf concrete, 12-12  
seawater corrosion—summary and review, 9-9

**RISERS, OFFSHORE PETRO WELLS**

coatings, cath prot on offshore structures, 11-22  
field experience data on pipeline coatings, 11-28  
metal sheathing for splash zone protection, 9-23

**Roofs, Metal Tank:** press vessel designs vs corros, 1-29

**Rubbers:** field data on pipeline coating, 11-28

**RURAL ATMOSPHERE**

acid rain attack on limestone, 11-47  
atmospheric corrosion—80 years of study, 7-9  
weathering steel rate calculations, 7-42  
20-y tests hot dip Al, Zn, AlZn steel, 7-37

**Rusted Steel:** tannin-based convers coatings data, 11-35

**SAFETY**

economic impact of concrete corrosion, 12-78  
H stress cracking failure—amine absorbers, 8-18  
H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11-41  
metal sheathing for splash zone protection, 9-23  
pipeline CP—NACE reviews criteria, 7-73  
potable water system cleaning with CO<sub>2</sub>, 5-21  
protective coatings—progress projection, 11-9  
RP0187-87—design CP of steel-reinf conc, 12-53  
underground storage tanks—EPA stance, 8-80  
zinc-sprayed coating on concrete for CP, 12-22

**SALT FOG OR SPRAY TESTING**

cathodic prot results on auto bodies, 7-82  
tannin-based conversion coatings data, 11-35

**SALT, CAUSES**

acoustical tests of casing in wells, 6-53  
copper alloys vs seawater—use guidelines, 9-12  
crevice attack tests for welded SS in seawater, 9-29  
duplex SS pipelines vs cold seawater, 2-49  
microbial attack monitoring at Prudhoe, 9-42  
mixed metal oxide anode characteristics, 7-45

**SAND**

prot coatings—progress projection, 11-9  
slurry pipeline eros-corros control, 12-41  
T-6G-22—surf prep contaminated steel, 3-49

**SATURATION, CONCENTRATION**

copper plumbing corrosion rate predictions, 3-9  
H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11-41  
potable water system cleaning with CO<sub>2</sub>, 5-21

**SCAVENGING, OXYGEN**

geothermal well drill protection, 8-34  
O<sub>2</sub> scavenging catalysts and inhibition, 8-48  
sulfite controls for boiler feedwater, 3-41  
toxicity reduction by glass, metal containers, 2-46

**Screws:** metal sheathing for splash zone prot, 9-23

**SEA, AQUEOUS**

boundary element anal offshore cath prot, 2-23  
coatings, cath prot on offshore structures, 11-22  
copper alloys vs seawater—use guidelines, 9-12  
copper cladding on steel welding methods, 11-17  
CP of Al-coated steel in sea water, 6-29  
crevice attack tests for welded SS in seawater, 9-29  
duplex SS pipelines vs cold seawater, 2-49  
field experience data on pipeline coatings, 11-28  
flame-sprayed Al on steel in seawater, 9-35  
marine environments characterization, 9-69  
marine environments corrosion, 10-81  
metal sheathing for splash zone protection, 9-23  
microbial attack monitoring at Prudhoe, 9-42  
mixed metal oxide anode characteristics, 7-45  
N alloying of FeCrNiMo process alloys, 6-18  
seawater corrosion—summary and review, 9-9  
toxicity reduction by glass, metal containers, 2-46

**Sea Bottom Environments:** coatings, cath prot on offshore structures, 11-22

**SEALS**

mixed metal oxide anode characteristics, 7-45  
RP0187-87—design CP of steel-reinf concrete, 12-53

**SEDIMENTARY STONE**

acid deposition atmos effects on materials, 7-12  
acid rain effects on carbonate stones, 7-33

**Segregations:** heat treat vs SCC of 7000 Al, 6-45

**Selenium:** AISI 308, 309 welds vs polythionic acids, 8-9

**Semiconductor Mater:** impact corros sci and eng, 10-9

**SENSITIZATION**

H<sub>2</sub>SO<sub>4</sub> attack mechanism in railroad cars, 11-41  
silicon-alloyed stainless steel vs O<sub>2</sub>, 1-49  
test of CF-3M steels to selective attack, 4-26  
thermal effects on CrNiMo duplex pipe, 8-25

**SEWAGE**

concrete resist to sulfate-reducing bacterial, 3-14  
organics vs cooling water low pH excursions, 5-11

**SHIPS**

coatings, cath prot on offshore structures, 11-22  
copper alloys vs seawater—use guidelines, 9-12  
copper cladding on steel welding methods, 11-17

**Short Circuits:** zinc-sprayed coating on conc for CP, 12-22

**SHOT BLASTING, SURF PREP**

T-6G-22—surf prep contaminated steel, 3-49  
zinc-sprayed coating on concrete for CP, 12-22

**Signal Controls:** impact of corros sci and eng, 10-9

**SILICA**

Disc—proc envir changes infl, 6-44  
geothermal well drill protection, 8-34  
properties of precast polymer concrete, 12-29

**Silicate Inhib:** potable water cleaning with  $\text{CO}_2$ , 5- 21  
**Silicon:** silicon-alloyed SS VS  $\text{O}_2$ , 1- 49  
**Silicone Lubricants:** T-6G-22—surf prep contam, 3- 49  
**Silicones:** flame-sprayed Al on steel in seawater, 9- 35  
**Silver-Silver Chloride Electrode:** anodic prot vs alkaline kraft pulping, 4- 31

**SLAG**

protective coatings—progress projection, 11- 9  
 RP0187-87—design CP of steel rein concrete, 12- 53

**Sleeves, Heat-Shrink:** field data on pipeline coat, 11- 28  
**Slime Effects:** Cu alloys vs seawater—use guides, 9- 12

**SLOW STRAIN RATE TESTS**

anodic prot vs alkaline kraft pulping, 4- 31  
 duplex SS pipelines vs cold seawater, 2- 49  
 slow strain rate, NACE TM0177 compared, 10- 42

**SLUDGE**

alloys to contain radioactive waste, 2- 40  
 life-cycle costs of flue gas desulf materials, 10- 50  
 slurry pipeline erosion-corrosion control, 12- 41  
 test for erosion-corrosion in slurries, 1- 21

**Slurry Inhib:** slurry pipeline eros-corros control, 12- 41  
**Snow:** arctic environ vs petrol refineries, 8- 53

**SODIUM CHLORIDE**

calculating magnesium anode efficiency, 8- 14  
 enhanced oil recovery well corrosion, 2- 16  
 inhibitor for Al 7075 in chloride solutions, 8- 42  
 slurry pipeline erosion-corrosion control, 12- 41  
 tannin-based conversion coatings data, 11- 35

**SODIUM HYDROXIDE**

polymers resistant to hot-wet chlorine, 1- 16  
 SS cladding wastage in recovery boilers, 11- 53

**Sodium Hypochlorite:** polymers resist to hot-wet Cl, 1- 16  
**Sodium Sulfite:** slurry pipeline eros-corros control, 12- 41

**SOILS**

Al wire properties infl vs atmospheric attack, 5- 50  
 cast iron pipe underground corrosion, 5- 42  
 pipe-to-soil IR drop compensating measures, 10- 38  
 RP0187-87—design CP of steel-rein concrete, 12- 53

**Solar Energy Sources:** metals atmos attack vs shelter, orientation, 7- 25

**SOLUBILITY**

hydrogen effects on steel, 1- 38  
 sulfite controls for boiler feedwater, 3- 41  
 tannin-based conversion coatings data, 11- 35

**SOLVENTS**

protective coatings—progress projection, 11- 9  
 T-6G-22—surf prep contaminated steel, 3- 49

**SPALLING**

economic impact of concrete corrosion, 12- 78  
 environmental attack on reinforced concrete, 12- 79  
 review cath prot of steel-rein concrete, 12- 12  
 RP0187-87—design CP of steel-rein concrete, 12- 53

**SPECIFICATIONS**

field experience data on pipeline coatings, 11- 28  
 RP0187-87—design CP of steel rein concrete, 12- 53

**SPLASH ZONE EFFECTS**

flame-sprayed Al on steel in seawater, 9- 35  
 metal sheathing for splash zone protection, 9- 23  
 review cath prot of steel-rein concrete, 12- 12

**Sprayed Concrete Coatings:** review cath prot of steel-rein concrete, 12- 12  
**Stacks:** NiCrMoWCo lining for flue gas, 11- 11

**STANDARDS**

atmospheric corrosion—80 years of study, 7- 9  
 pressure vessel design vs corrosion, 1- 29  
 review cath prot of steel-rein concrete, 12- 12  
 RP0187-87—design CP of steel-rein concrete, 12- 53  
 RP0287-87—surf profile meas using replica tape, 11- 57  
 RP0387-87—cast CPanodes for offshore CP, 9- 55

**STANDBY TECHNIQUES**

coating: vapor attack on Cd-plated metals, 8- 32  
 sulfite controls for boiler feedwater, 3- 41  
 underground storage tanks—EPA stance, 8- 80

**STATISTICS**

acid deposition atmos effects on materials, 7- 12  
 cast iron pipe underground corrosion, 5- 42  
 coatings, cath prot on offshore structures, 11- 22  
 field experience data on pipeline coatings, 11- 28  
 microbial attack monitoring at Prudhoe, 9- 42  
 steel-reinforced concrete status review, 12- 9

**STEAM**

acoustical tests of casing in wells, 6- 53  
 Erratum—additives for steam, water cycles, 5- 55  
 copper alloys vs seawater—use guidelines, 9- 12  
 enhanced oil recovery well corrosion, 2- 18  
 geothermal well drill protection, 8- 34  
 intergran attack Alloy 600 in nuclear reactors, 3- 18  
 nitrogen inhib distribution in steam, water, 23- 36  
 process, environmental infl on corrosion, 1- 11

**Steam Cleaning:** T-6G-22 surf prep contam steel, 3- 49

**Steam Turbines:** N inhib distribution in steam, water, 3- 30

**STEEL-REINFORCED HYDRAULIC CONCRETE**

economic impact of concrete corrosion, 12- 78  
 environmental attack on reinforced concrete, 12- 79  
 review cath prot of steel-rein concrete, 12- 12  
 RP0187-87—design CP of steel-rein concrete, 12- 53  
 steel-reinforced concrete status review, 12- 9  
 zinc-sprayed coating on concrete for CP, 12- 22

**STEELS, AISI**

AISI 306, 309 welds vs polythionic acids, 8- 9  
 alloys to contain radioactive waste, 2- 40  
 duplex SS pipelines vs cold seawater, 2- 49  
 flue gas cyclic reheat exchangers—Part 3, 4- 44  
 high-Cr steels vs 600 to 650 C coal combustion, 6- 9  
 life-cycle costs of flue gas desulf materials, 10- 50  
 low-Ni nonmagnetic well drill collar alloy, 9- 50  
 metal sheathing for splash zone protection, 9- 23  
 mixed acids vs nickel-based alloys, 10- 17  
 SS cladding wastage in recovery boilers, 11- 53  
 test for erosion-corrosion in slurries, 1- 21

**STEELS, CARBON, WROUGHT**

environmental attack on reinforced concrete, 12- 79  
 slow strain rate, NACE TM0177 compared, 10- 42  
 sulfide stress cracking—low-alloy steels, 2- 9

**STEELS, CAST CHROMIUM-NICKEL**

paper mill suction roll fatigue tests, 4- 37  
 paper mill suction roll perform predictions, 10- 30  
 test of CF-3M steels to selective attack, 4- 26

**STEELS, CHROMIUM**

flue gas cyclic reheat exchangers—Part 3, 4- 44  
 paper mill suction roll fatigue tests, 4- 37  
 paper mill suction roll perform prediction, 10- 30  
 test for erosion-corrosion in slurries, 1- 21

**STEELS, CHROMIUM-NICKEL, AUSTENITIC**

crevice attack tests for welded SS in seawater, 9- 29  
 hydrogen effects on steel, 1- 38  
 N alloying of FeCrNiMo process alloys, 6- 18  
 paper mill suction roll fatigue tests, 4- 37  
 paper mill suction roll perform prediction, 10- 30  
 silicon-alloyed stainless steel vs  $\text{O}_2$ , 1- 49

**STEELS, CrNiFe, PRECIPITATION HARDENING**

Erratum—N use to protect FeCrNiMo alloys, 10- 29  
 $\text{FeCl}_3$  test modification vs nickel alloys, 3- 37  
 life-cycle costs of flue gas desulf materials, 10- 50

**Steels, Ferritic:** flue gas cyclic reheat—Part 3, 4- 44

**Steels, Ferritic-Austenitic:** paper mill suction roll fatigue tests, 4- 37

**STEELS, INCONEL**

alloys to contain radioactive waste, 2- 40  
 $\text{FeCl}_3$  test modification vs nickel alloys, 3- 37  
 flue gas cyclic reheat exchangers—Part 3, 4- 44  
 life-cycle costs of flue gas desulf materials, 10- 50

**STEELS, NiCr, OTHER**

alloys to contain radioactive waste, 2- 40  
 high-Cr steels vs 600 to 650 C coal combustion, 6- 9  
 intergran attack Alloy 600 in nuclear reactors, 3- 18  
 low-Ni nonmagnetic well drill collar alloy, 9- 50

**STEELS, NICKEL**

alloys to contain radioactive waste, 2- 40  
 nickel steels in arctic petroleum service, 10- 46

**STEELS, WEATHERING**

metals atmos attack vs shelter, orientation, 7- 25  
 weathering steels rate calculations, 7- 42

**Sterilization, Bactericides:** biological attack in cooling water systems, 5- 34

**STRAY CURRENTS**

pipe-to-soil IR drop compensating measures, 10- 38  
 RP0187-87—design CP of steel—rein concrete, 12- 53

**STRESS CELLS**

boiler tube fabrication stress cells effects, 5- 17  
 SCC of brass electrical connectors, 7- 20

**STRESS CORROSION CRACKING**

anodic prot vs alkaline kraft pulping, 4- 31  
 copper alloys vs seawater—use guidelines, 9- 12  
 Disc—sulfide stress cracking on two steels, 7- 54  
 duplex SS pipelines vs cold seawater, 2- 49  
 field experience data on pipeline coatings, 11- 28  
 heat treat vs SCC of 7000 aluminum alloys, 6- 45  
 $\text{H}_2$  absorption pretensioned steel tendons, 12- 32  
 low-Ni nonmagnetic well drill collar alloy, 9- 50  
 metal sheathing for splash zone protection, 9- 23  
 pressure vessel design vs corrosion, 1- 29  
 SCC of brass electrical connectors, 7- 20  
 slow strain rate, NACE TM0177 compared, 10- 42  
 sulfide stress cracking—low-alloy steels, 2- 9  
 test of CF-3M steels to selective attack, 4- 26

**Stress Relieving:** H stress cracking failure—amine absorbers, 8- 18

**SUCTION FILTERS**

paper mill suction roll fatigue tests, 4- 37  
 paper mill suction roll perform predictions, 10- 30

**Sulfamic Acid:** chlorine decomposition of HEDP, 10- 24

**SULFATES**

acid rain attack on limestone, 11- 47  
 ammonium sulfate vs wood, copper piping, 2- 45  
 calculating magnesium anode efficiency, 8- 14  
 T-6G-22—surf prep contaminated steel, 3- 49

**SULFIDES**

acid rain attack on limestone, 11- 47  
 acid rain effects on carbonate stones, 7- 33  
 anodic prot vs alkaline kraft pulping, 4- 31  
 copper alloys vs seawater—use guidelines, 9- 12  
 copper in modern corrosion research, 4- 9  
 corrosion reactions under boiler deposits, 5- 29  
 flue gas cyclic reheat exchangers—Part 3, 4- 44  
 metals atmos attack vs shelter, orientation, 7- 25  
 properties of precast polymer concrete, 12- 29  
 slow strain rate, NACE TM0177 compared, 10- 42  
 T-6G-22—surf prep contaminated steel, 3- 49

**Sulfite Scavengers:** sulfite cont for boiler feedwater, 3- 41

**Sulfites:** acid rain attack on limestone, 11- 47

**Sulfur Dioxide:** atmos corros—80 years of study, 7- 9

**SULFUR**

acid deposition atmos effects on materials, 7- 12  
 acid rain attack on limestone, 11- 47  
 acoustical tests of casing in wells, 6- 53  
 enhanced oil recovery well corrosion controls, 2- 16  
 $\text{H}_2\text{SO}_4$  attack mechanism in railroad cars, 11- 41  
 metals atmos attack vs shelter, orientation, 7- 25  
 sulfite controls for boiler feedwater, 3- 41

**SULFURIC ACIDS**

flue gas cyclic reheat exchangers—Part 3, 4- 44  
 mixed acids vs nickel-based alloys, 10- 17  
 N alloying of FeCrNiMo process alloys, 6- 18  
 process, environmental infl on corrosion, 1- 11  
 properties of precast polymer concrete, 12- 29

**SURFACE PREPARATION**

flame-sprayed Al on steel in seawater, 9- 35  
 N alloying of FeCrNiMo process alloys, 6- 18  
 NiCrMoWCo lining for flue gas stacks, 11- 11  
 protective coatings—progress projection, 11- 9  
 RP0287-87—surf profile meas using replica tape, 11- 57  
 T-6G-22—surf prep contaminated steel, 3- 49  
 tannin-based conversion coatings data, 11- 35

**SURVEILLANCE, ON SITE**

#### TANKS

application of coatings to concrete, 12- 82  
arctic environments vs petroleum refineries, 8- 53  
chemical process industries current status, 1- 4  
coating vapor attack on Cd-plated metals, 8- 32  
H stress cracking failure—amine absorbers, 8- 18  
hydrogen effects on steel, 1- 38  
 $H_2SO_4$  attack mechanism in railroad cars, 11- 41  
pressure vessel design vs corrosion, 1- 29  
properties of precast polymer concrete, 12- 29  
underground storage tanks—EPA stance, 8- 80

#### TANNIN, INHIBITORS

nitrogen inhib distribution in steam, water, 23- 36  
 $O_2$  scavenging catalysts and inhibition, 8- 48  
sulfite controls for boiler feedwater, 3- 41  
tannin-based conversion coatings data, 11- 35

**Tantalum:** Disc—proc envir changes influence, 6- 44

#### TAPE COATINGS

Al wire properties infl vs atmospheric attack, 5- 50  
cast iron pipe underground corrosion, 5- 42  
field experience data on pipeline coatings, 11- 28

#### TEMPERATURE—-100 TO -20 C

arctic environments vs petroleum refineries, 8- 53  
corrosion reactions under boiler deposits, 5- 29  
duplex SS pipelines vs cold seawater, 2- 49  
nickel steels in arctic petroleum service, 10- 46

#### TEMPERATURE—0 TO 100 C

chlorine decomposition of HEDP, 10- 24  
crevice attack tests for welded Se in seawater, 9- 29  
field experience data on pipeline coatings, 11- 28  
geothermal well drill protection, 8- 34  
life-cycle costs of flue gas desulf materials, 10- 50  
metal sheathing for splash zone protection, 9- 23  
metals vs microbes in 70 C water, 2- 35  
mixed metal oxide anode characteristics, 7- 45  
polymeric alkaline corrosion inhibitors, 4- 17  
polymers resistant to hot-wet chlorine, 1- 16  
potable water system cleaning with  $CO_2$ , 5- 21  
seawater corrosion—summary and review, 9- 9

#### TEMPERATURE—100 TO 200 C

flue gas cyclic reheat exchangers—Part 3, 4- 44  
life-cycle costs of flue gas desulf materials, 10- 50  
low-Ni nonmagnetic well drill collar alloy, 9- 50  
NiCrMoWCo lining for flue gas stack, 11- 11  
nitrogen inhib distribution in steam, water, 23- 36

#### TEMPERATURE—300 TO 400 C

metal sheathing for splash zone protection, 9- 23  
SS cladding wastage in recovery boilers, 11- 53

#### TEMPERATURE—500 TO 1000 C

corrosion reactions under boiler deposits, 5- 29  
high-Cr steels vs 600 to 650 C coal combustion, 6- 9

#### TEMPERATURE, CAUSES

Al wire properties infl vs atmospheric attack, 5- 50  
boundary element anal offshore cath prot, 2- 23  
cast iron pipe underground corrosion, 5- 42  
copper alloys vs seawater—use guidelines, 9- 12  
corrosion reactions under boiler deposits, 5- 29  
crevice attack tests for welded SS in seawater, 9- 29  
 $FeCl_3$  test modification vs nickel alloys, 3- 37  
hydrogen effects on steel, 1- 38  
polymeric alkaline corrosion inhibitors, 4- 17  
potable water system cleaning with  $CO_2$ , 5- 21  
slow strain rate, NACE TM0177 compared, 10- 42  
test for erosion-corrosion in slurries, 1- 21

**Temperature Cells, Causes:** microbial attack monitoring at Prudhoe, 9- 42

#### TEMPERATURE EFFECTS

field experience data on pipeline coatings, 11- 28  
mixed acids vs nickel-based alloys, 10- 17  
review cath prot of steel-reinf concrete, 12- 12  
RP0187-87—design CP of steel-reinf concrete, 12- 53

**Temporary Coatings:** geothermal well drill prot, 8- 34

#### TENSILE STRESSES

anodic prot vs alkaline kraft pulping, 4- 31  
application of coatings to concrete, 12- 82  
copper alloys vs seawater—use guidelines, 9- 12  
paper mill suction roll perform predictions, 10- 30  
SCC of brass electrical connectors, 7- 20

#### TESTING

acid rain attack on limestone, 11- 47  
concrete resist to sulfate-reducing bacteria, 3- 14  
copper in modern corrosion research, 4- 9  
 $H_2$  absorption pretensioned steel tendons, 12- 32  
metals, atmos attack vs shelter, orientation, 7- 25  
paper mill suction roll perform predictions, 10- 30  
polymeric alkaline corrosion inhibitors, 4- 17  
RP0187-87—design CP of steel-reinf concrete, 12- 53  
seawater corrosion—summary and review, 9- 9  
slow strain rate, NACE TM0177 compared, 10- 42  
test of CF-3M steels to selective attack, 4- 26

**Thermal Insulation:** press vessel design vs corros., 1- 29

#### THICK FILM ORGANIC COATINGS

Al wire properties infl vs atmospheric attack, 5- 50  
cast iron pipe underground corrosion, 5- 42

**Thiosulfates:** paper mill suction roll fatigue tests, 4- 37

#### TIME—LESS THAN 10 YEARS

alloys to contain radioactive waste, 2- 40  
metals atmos attack vs shelter, orientation, 7- 25  
underground storage tanks—EPA stance, 8- 80

#### TIME—LESS THAN 5 YEARS

anodic prot vs alkaline kraft pulping, 4- 31  
silicon-alloyed stainless steel vs  $O_2$ , 1- 49  
SS cladding wastage in recovery boilers, 11- 53  
zinc-sprayed coating on concrete for CP, 12- 22

#### TIME—LESS THAN 52 WEEKS

acid rain attack on limestone, 11- 47  
acid rain effects on carbonate stones, 7- 33  
flue gas cyclic reheat exchangers—Part 3, 4- 44  
metals atmos attack vs shelter, orientation, 7- 25  
toxicity reduction by glass, metal containers, 2- 46

#### TIME—LESS THAN 24 WEEKS

flame-sprayed Al on steel in seawater, 9- 35  
metals atmos attack vs shelter, orientation, 7- 25  
toxicity reduction by glass, metal containers, 2- 46

#### TIME—LESS THAN 4 WEEKS

slow strain rate, NACE TM0177 compared, 10- 42  
tannin-based conversion coatings data, 11- 35

#### TIME—MORE THAN 10 YEARS

atmospheric corrosion—80 years of study, 7- 9  
coatings, cath prot on offshore structures, 11- 22  
environmental attack on reinforced concrete, 12- 79  
field experience data on pipeline coatings, 11- 28  
life-cycle costs of flue gas desulf materials, 10- 50  
metal sheathing for splash zone protection, 9- 23  
paper mill suction roll perform predictions, 10- 30  
review cath prot of steel-reinf concrete, 12- 12  
seawater corrosion—summary and review, 9- 9  
weathering steels rate calculations, 7- 42  
20-y tests hot dip Al, Zn, AlZn steel, 7- 37

**Tin Coatings:** zinc-sprayed coating on conc for CP, 12- 22

#### TITANIUM

AISI 308, 309 welds vs polythionic acids, 8- 9  
copper alloys vs seawater—use guidelines, 9- 12  
flue gas cyclic reheat exchangers—Part 3, 4- 44  
metals vs microbes in 70 C water, 2- 35  
mixed metal oxide anode characteristics, 7- 45  
review CP of steel rein conc, 12- 12

#### TRANSGRANULAR CRACKING

corrosion fatigue—basics, 1- 63  
heat treat vs SCC of 7000 aluminum alloys, 6- 45

#### TROPICAL INLAND ATMOSPHERES

atmospheric corrosion basic information, 7- 61  
biological attack in cooling water systems, 5- 35  
chemical process industries current status, 1- 4

**Tuberculation Effects:** corrosion reactions under boiler deposits, 5- 29

#### TURBULENCE

cavitation fundamentals, 6- 67  
 $H_2SO_4$  attack mechanism in railroad cars, 11- 41

#### ULTRASONIC TESTING

acoustic tests of casing in wells, 6- 53  
computer-assisted tomography of steel, 12- 46  
H stress cracking failure—amine absorbers, 8- 18  
 $H_2SO_4$  attack mechanism in railroad cars, 11- 41

#### ULTRAVIOLET LIGHT

biological attack in cooling water systems, 5- 35  
field experience data on pipeline coatings, 11- 28  
T-6G-22—surf prep contaminated steel, 3- 49

#### UNDERGROUND ENVIRONMENTS

cast iron pipe underground corrosion, 5- 42  
field experience data on pipeline coatings, 11- 28  
mixed metal oxide anode characteristics, 7- 45  
underground storage tanks—EPA stance, 8- 80

#### UNDERWATER ENVIRONMENTS

field experience data on pipeline coatings, 11- 28  
underground storage tanks—EPA stance, 8- 80

**Underwater Cath Prot:** zinc-sprayed coating on conc for CP, 12- 22

**Urea:** life-cycle costs of flue gas desulf materials, 10- 50  
**Urethane:** coat vapor attack on Cd-plated metals, 8- 32

#### VACUUM APPLICATION, METAL COATINGS

copper in modern corrosion research, 4- 9  
impact of corrosion science and engineering, 10- 9

#### VALVES

copper alloys vs seawater—use guidelines, 9- 12  
hydrogen effects on steel, 1- 38  
nickel steels in arctic petroleum service, 10- 46

**Vanadium:** low-Ni nonmagnetic well drill collar alloy, 9- 50

#### VELOCITY

arctic environments vs petroleum refineries, 8- 53  
cavitation fundamentals, 6- 67  
copper alloys vs seawater—use guidelines, 9- 12  
erosion-corrosion fundamentals, 5- 81  
flue gas cyclic reheat exchangers—Part 3, 4- 44  
geothermal well drill protection, 8- 34  
metal sheathing for splash zone protection, 9- 23  
process, environmental infl on corrosion, 1- 11  
slurry pipeline erosion-corrosion control, 12- 41

#### VERTICAL SURFACES

review cath prot of steel-reinf concrete, 12- 12  
zinc-sprayed coating on concrete for CP, 12- 22

#### VINYL THIN FILM COATINGS

coating vapor attack on Cd-plated metals, 8- 32  
flame-sprayed Al on steel in seawater, 9- 35

metals atmos attack vs shelter, orientation, 7- 25

#### VINYLS

polymers resistant to hot-wet chlorine, 1- 16  
properties of precast polymer concrete, 12- 29

#### VOLTAGE EFFECTS

pipe-to-soil IR drop compensating measures, 10- 38  
pipeline CP—NACE reviews criteria, 7- 73

**Volumetric Effects:** environmental attack on rein concrete, 12- 79

**Washing:** T-6G-22—surf prep contaminated steel, 3- 49

#### WASTE DISPOSAL

alloys to contain radioactive waste, 2- 40  
copper in modern corrosion research, 4- 9  
potable water systems—status review, 5- 9  
underground storage tanks—EPA stance, 8- 80

#### WATER

copper cladding on steel welding methods, 11- 17  
NiCrMoWCo lining for flue gas stacks, 11- 11  
RP0187-87—design CP of steel-reinf concrete, 12- 53

**WATER-BASE COATINGS**

protective coatings—progress projection, 11-9  
tannin-based conversion coatings data, 11-35

**WATER BLAST SURFACE PREP**

protective coatings—progress projection, 11-9  
T-6G-22—surf prep contaminated steel, 3-49

**WATER INDUSTRIES**

acoustical tests of casing in wells, 6-53  
characteristic of protective coatings, 11-79  
copper in modern corrosion research, 4-9  
copper plumbing corrosion rate predictions, 3-9  
corrosion fatigue—basics, 1-63  
corrosion reactions under boiler deposits, 5-29  
metals vs microbes in 70 C water, 2-35  
polymers resistant to hot-wet chlorine, 1-16  
process, environmental infl on corrosion, 1-11  
RP0187-87—design CP of steel-reinf concrete, 12-53

**Water, Atmospheric Cooling Systems:** chlorine decomposition of HEDP, 10-24

**WATERFLOOD, OIL RECOVERY**

enhanced oil recovery well corrosion controls, 2-16  
microbial attack monitoring at Prudhoe, 9-42  
toxicity reduction by glass, metal containers, 2-46

**Weight Changes:** alloy equiv wt calc meth, 12-51

**WEIGHT LOSS TESTS**

acid rain effects on carbonate stones, 7-33  
anodic prot vs alkaline kraft pulping, 4-31  
biological attack in cooling water systems, 5-35  
concrete resist to sulfate-reducing bacteria, 3-14  
copper alloys vs seawater—use guidelines, 9-12  
flue gas cyclic reheat exchangers—Part 3, 4-44  
inhibitors for Al 7075 in chloride solutions, 8-42  
metals atmos attack vs shelter, orientation, 7-25

metals vs microbes in 70 C water, 2-35

mixed acids vs nickel-based alloys, 10-17  
N alloying of FeCrNiMo process alloys, 6-18  
RP0387-87—cast CP anodes for offshore, 9-55  
weathering steels rate calculations, 7-42

**WELDING**

AISI 308, 309 welds vs polythionic acids, 8-9  
anodic prot vs alkaline kraft pulping, 4-31  
arctic environments vs petroleum refineries, 8-53  
boiler tube fabrication stress cells effects, 5-17  
copper alloys vs seawater—use guidelines, 9-12  
crevice attack tests for welded SS in seawater, 9-29  
duplex SS pipelines vs cold seawater, 2-49  
field experience data on pipeline coatings, 11-28  
flue gas cyclic reheat exchangers—Part 3, 4-44  
H stress cracking failure—amine absorbers, 8-18  
hydrogen effects on steel, 1-38  
hydrogen embrittlement fundamentals, 2-71  
metal sheathing for splash zone protection, 9-23  
N alloying of FeCrNiMo process alloys, 6-18  
NiCrMoWCo lining for flue gas stacks, 11-11  
nickel steels in arctic petroleum service, 10-46  
pressure vessel design vs corrosion, 1-29  
RP0187-87—design CP of steel-reinf concrete, 12-53  
RP0387-87—cast CP anodes for offshore, 9-55  
silicon-alloyed stainless steel vs  $O_2$ , 1-49  
test of CF-3M steels to selective attack, 4-28  
thermal effects on CrNiMo duplex pipe, 8-25

**WELL DRILLING EQUIPMENT**

geothermal well drill protection, 8-34  
low-Ni nonmagnetic well drill collar alloy, 9-50  
sulfide stress cracking—low-alloy steels, 2-9

**WET BLASTING SURF PREP**

protective coatings—progress projection, 11-9  
T-6G-22—surf prep contaminated steel, 3-49

**WETNESS, TIME OF**

atmospheric corrosion factors, 8-79  
cathodic prot results on auto bodies, 7-82

**WHITE OR BLACK LIQUORS, PAPER INDUSTRY**  
paper mill suction roll fatigue tests, 4-37  
paper mill suction roll perform predictions, 10-30

**Wind:** arctic environ vs petro refineries, 8-53

**WOOD**

ammonium sulfate vs wood copper piping, 2-45  
coating vapor attack on Cd-plated metals, 8-32

**X-RAY TESTING**

acid rain attack on limestone, 11-47  
copper in modern corrosion research, 4-9  
tannin-based conversion coatings data, 11-35

**ZINC**

acid deposition atmos effects on materials, 7-12  
atmospheric corrosion—80 years of study, 7-9  
metals atmos attack vs shelter, orientation, 7-25

**ZINC ANODES, CATHODIC PROTECTION**

cathodic prot results on auto bodies, 7-82  
coatings, cath prot on offshore structures, 11-22

**ZINC COATINGS**

CP of Al-coated steel in seawater, 6-29  
CP on offshore structures, 11-22  
review cath prot of steel-reinf concrete, 12-12  
zinc-sprayed coating on concrete for CP, 12-22

**ZINC, INHIBITORS CONTAINING**

polymeric alkaline corrosion inhibitors, 4-17  
slurry pipeline erosion-corrosion controls, 12-41

**Zircaloy:** flue gas cyclic reheat exchangers—Part 3, 4-44
